New Perennial Planting Guide For Novices And Dummies Sandra Bronson, 2020-11-13 Perennials are plants that live for at least 2 consecutive years Technically herbaceous perennials die back in the fall and winter but most gardeners use the term to describe plants that typically bloom during the growing season Some perennials only live for 2 years while others may live for thousands of years Unlike annuals which last only a single growing season and depend on rapid growth a perennial grows from the root enabling it to bloom through multiple growing seasons There are hundreds of different types of perennials which vary in size from less than 1 inch to 54 meters tall Some perennials feature colorful blooms while others like ferns and grasses are not decorative Upright perennials in your garden determine when to plant perennials In many regions the ideal time to plant perennials is mid to late spring plants have the time to

become too late before the first frost. Do not plant in the fall while the average frost-free period is below 25 degrees Fahrenheit or 38 degrees Celsius. Plant in the spring but not too late with plants that do not have time to establish before the ground freezes. Research a perennial to determine when its ideal planting time is. The best time to plant perennials varies depending on the climate and growing conditions. Ask a professional at a local garden center but the best time to plant a perennial plant varies with the climate. Perennials can grow in almost any location in the garden. For example, plant in the shade around a tree or in a grouping in the middle of a yard. Determine how much sunlight the area will receive. This will be an important factor in planting the perennials that will grow in that location.

Flowering perennials are the

backbone of any garden. Most perennials have a natural life cycle. Perennial plants die back in cold weather then sprout again next spring and the spring after that. What sets perennial plants apart from shrubs, which may also be perennial, is that garden perennials are herbaceous. Shrubs typically have woody branches. Not all perennials are created equal. Some have a brief bloom season and others flower for months. Short-lived perennials such as poppies, lupines, or columbines may die after two or three years. Dutch master garden designer Piet Oudolf, famous for his painterly landscapes of mixed perennials, favors hardier, long-lived perennials such as salvias, Veronicas, asters, and Monardas.
