THE CAMBRIAN TRAVELLER'S GUIDE, IN EVERY DIRECTION, 1813 A Research Guide to the Ancient World

John M. Weeks, Jason de Medeiros, 2014-11-25 The archaeological study of the ancient world has become increasingly popular in recent years A Research Guide to the Ancient World Print and Electronic Sources is a partially annotated bibliography The study of the ancient world is usually although not exclusively considered a branch of the humanities including archaeology art history languages literature philosophy and related cultural disciplines which consider the ancient cultures of the Mediterranean world and adjacent Egypt and southwestern Asia Chronologically the ancient world would extend from the beginning of the Bronze Age of ancient Greece ca 1000 BCE to the fall of the Western Roman Empire ca 500 CE This book will close the traditional subject gap between the humanities Classical World Egyptology and the social sciences anthropological archaeology Near East in the study of the ancient world This book is uniquely the only bibliographic resource available for such holistic coverage The volume consists of 17 chapters and seven appendixes arranged according to the traditional types of library research materials bibliographies dictionaries atlases etc The appendixes are mostly subject specific including graduate programs in ancient studies reports from significant archaeological sites numismatics and paleography and writing systems These extensive author and subject indexes help facilitate ease of use **Catalog of Copyright Entries. Burnham's Celestial Handbook, Volume Three Robert Burnham, 2013-04-15 Volume III of a comprehensive three part guide to celestial objects outside our solar system concludes with listings from Pavo to Vulpecula While there are many books on stars there is only one Celestial Handbook Now completely revised through 1977 this unique and necessary reference is available once again to guide amateur and advanced astronomers in their knowledge and enjoyment of the stars After an extensive introduction in Volume I which gives the beginner enough information to follow about 80 percent of the body of the material the author gives comprehensive coverage to the thousands of celestial objects outside our solar system that are within the range of telescopes in the two to twelve inch range The objects are grouped according to the constellations in which they appear Each constellation is divided into four subject sections list of double and multiple stars list of variable stars list of star clusters nebulae and galaxies and descriptive notes For each object the author gives names celestial coordinates classification and full physical description These together with a star atlas will help you find and identify almost every object of interest But the joy of the book is the descriptive notes that follow They cover history unusual

movements or appearance and currently accepted explanations of such visible phenomena as white dwarfs novae and super novae cepheids mira type variables dark nebulae gaseous nebulae eclipsing binary stars the large Magellanic cloud the evolution of a star cluster and hundreds of other topics many of which are difficult to find in one place Hundreds of charts and other visual aids are included to help in identification Over 300 photographs capture the objects and are works of beauty that reflect the enthusiasm that star gazers have for their subject Robert Burnham Jr who was on the staff of the Lowell Observatory Flagstaff Arizona conceived the idea of The Celestial Handbook decades ago when he began assembling a notebook of all the major facts published about each celestial object In its former privately printed edition this handbook was acclaimed as one of the most helpful books for astronomers on any level Harper's New Monthly Magazine ,1875
