The Mandela Revolution Huw Lawford, 2022-01-28 On 27 April 1994 South Africa went to the polls and delivered the first black government in the country's history This was the Mandela Revolution This is not the story of how the Rainbow Nation was formed but it tells a story of one part of the revolution a vital part that had to occur to give legitimacy to the new South Africa both at home and abroad It highlights the political necessity that drove a process and the seemingly inevitable failure that it became Not a failure of the process itself but a failure that had to occur to permit acceptability it resulted in the end of South Africa as a hegemony This account focuses on how the military forces supporting the Apartheid regime and those committed to its overthrow came together to form a new national force reflecting the new multi racial multi faith democracy The process appeared unacceptable in some measure to all sides but the political instruction in 1994 was that there was to be the integration of the South African defense Force and the armed wings of the African National Congress and the Pan Africanist Congress to form the South African National defense Force Within this revolution there was a small detachment from the British armed forces that were charged with assisting this transition They were required to oversee and assist a process that had never been done before and often had to operate alone It is a story of highs and lows of sudden death breakdowns and ultimately of hope This is a personal account of three years spent in the middle of this staggering transitional experiment It was Security Sector Reform and Disarmament Demobilisation and Reintegration DDR before such processes were coined by the United Nations and arguably it was considerably more successful than any such

venture attempted by the United Nations It is a book that demonstrates how success and failure can occur simultaneously

The Russian Understanding of War Oscar Jonsson,2019-11-01 This book analyzes the evolution of Russian military thought and how Russia's current thinking about war is reflected in recent crises While other books describe current Russian practice Oscar Jonsson provides the long view to show how Russian military strategic thinking has developed from the Bolshevik Revolution to the present He closely examines Russian primary sources including security doctrines and the writings and statements of Russian military theorists and political elites What Jonsson reveals is that Russia's conception of the very nature of war is now changing as Russian elites see information warfare and political subversion as the most important ways to conduct contemporary war Since information warfare and political subversion are below the traditional threshold of armed violence this has blurred the boundaries between war and peace Jonsson also finds that Russian leaders have particularly since 2011-12 considered themselves to be at war with the United States and its allies albeit with non violent means This book provides much needed context and analysis to be able to understand recent Russian interventions in Crimea and eastern Ukraine how to deter Russia on the eastern borders of NATO and how the West must also learn to avoid inadvertent escalation
