

Lesson One

The Nature of Law

Aims

The aims of this lesson are to enable you to

- define what law is
- distinguish law from morality and justice, where appropriate
- indicate how and why law is divided up into separate areas of study

Context

The lessons which follow this one give more detail as to how our legal system has developed, and how laws are made within it. This lesson introduces these areas.

Note

It is important to emphasise here that this lesson, like all the lessons in the course, contains much detail and information which has been carefully selected, and which is necessary for your study.

It will be best, as you work through the course, and for revision purposes, if you could organize a system of notes for important definitions cases and other details. You might choose to use index cards (one set for cases, another for definitions, etc) cross-referenced to the sections of our course. (For further suggestions, see the Note at the beginning of Lesson Three). Above all, do not be put off by what may appear dauntingly complex and detailed material: persistent work will achieve all the results you could wish for.
