Myers, Gregory Kogan, 2021-06-02 Project governance investment governance and risk governance precepts are woven together in Self Service Data Analytics and Governance for Managers equipping managers to structure the inevitable chaos that can result as end users take matters into their own hands Motivated by the promise of control and efficiency benefits the widespread adoption of data analytics tools has created a new fast moving environment of digital transformation in the finance accounting and operations world where entire functions spend their days processing in spreadsheets With the decentralization of application development as users perform their own analysis on data sets and automate spreadsheet processing without the involvement of IT governance must be revisited to maintain process control in
