Techniques Hamido Fujita,Ali Selamat,2019-09-15 Software has become ever more crucial as an enabler from daily routines to important national decisions But from time to time as society adapts to frequent and rapid changes in technology software development fails to come up to expectations due to issues with efficiency reliability and security and with the robustness of methodologies tools and techniques not keeping pace with the rapidly evolving market This book presents the proceedings of SoMeT_19 the 18th International Conference on New Trends in Intelligent Software Methodologies Tools and Techniques

held in Kuching Malaysia from 23-25 September 2019. The book explores new trends and theories that highlight the direction and development of software methodologies, tools, and techniques and aims to capture the essence of a new state of the art in software science and its supporting technology and to identify the challenges that such a technology will have to master. The book also investigates other comparable theories and practices in software science including emerging technologies from their computational foundations in terms of models, methodologies, and tools. The 56 papers included here are divided into 5 chapters: Intelligent software systems design and techniques in software engineering; Machine learning techniques for software systems; Requirements engineering software design and development techniques; Software methodologies, tools, and techniques for industry and Knowledge science and intelligent computing. This comprehensive overview of information systems and research projects will be invaluable to all those whose work involves the assessment and solution of real-world software problems.

Nuclear Waste Gene Aloise, 2011-08. The Dept of Energy's Office of Environmental Management (EM) is responsible for one of the world's largest cleanup programs: treatment and disposal of radioactive and hazardous waste created as a by-product of nuclear weapons production and energy research at sites across the country such as EM's Hanford Site in Washington State and the Savannah River Site in South Carolina. Computer models (CM) which represent physical and biogeochemical processes as math formulas are one tool EM uses in the cleanups. This report 1 describes how EM uses CM in cleanup decisions; 2 evaluates how EM ensures the quality of its CM; and 3 assesses EM's overall strategy for managing its CM. This is a print-on-demand report.

Proceedings, 1993. From a May 1993 symposium in Baltimore, 15 papers explore measurement in software engineering. Among the topics are inter-item correlations among function points, maintenance metrics for the object-oriented paradigm, and dynamic system complexity. The case studies include determining the value of a corporate reuse program and the validation of structure metrics. No subject index.
