Advances in Statistical Methodologies and Their Application to Real Problems Tsukasa Hokimoto, 2017-04-26 In recent years statistical techniques and methods for data analysis have advanced significantly in a wide range of research areas. These developments enable researchers to analyze increasingly large datasets with more flexibility and also more accurately estimate and evaluate the phenomena they study. We recognize the value of recent advances in data analysis techniques in many different research fields. However, we also note that awareness of these different statistical and probabilistic approaches may vary owing to differences in the datasets typical of different research fields. This book provides a cross disciplinary forum for exploring the variety of new data analysis techniques emerging from different fields. **32 Months In The Jail** Navneet Singh, This is the story of Sunny, a character who spent part of his life in the country Serendib. Based on the title, you might assume that this is a humorous or serious account of his 32 month incarceration. He is not some imprisoned revolutionary or protester who spent their entire life expressing his or her views and points of view while imprisoned. His story, on the other hand, is told in a modern style with some freedom and a lot of obstacles. By reading the first two paragraphs, you can see he wasn't in jail, but the way he spent these months was anything but. Based on the situation, this book covers a wide range of themes, beginning with the arrival in the jail and finishing with the release. To conceal their true identities, all the real characters and locations were given new and anonymous aliases. Suddenly nothing can be taken for granted visiting ailing relatives shopping or going to church. The internet and particularly social networking sites have become the indispensable infrastructure holding our sociability together. The global companies of the digital economy profited handsomely. How about the users of their services? This volume explores how priests inhabit the digital environment of social networking sites specifically Facebook. The authors looked at how they present themselves what they publish and how people engage with this content. The context of the pandemic suggested that we should also examine how digital technology and social media are being used for purposes of priestly ministry. Our hope is that these analyses and considerations will help not just priests but every person at becoming proficient not only in things virtual but also in practicing virtue. *Media in the Digital Age* John Vernon Pavlik, 2008 Digital technologies have fundamentally altered the nature and function of media in our society.
