

SABRE Interface Preparation

Preparing for Interface

Preparing for interface starts by contacting your SABRE representative. Interface is an option offered by SABRE, and there may be charges incurred. Trams does not charge for interface options. SABRE enables interface options by assigning a line number or address referred to as a LNIATA. This is similar to the terminal and printer addresses in your main office. Any branch access and STP sites should be linked via SABRE, and Interface options should be discussed with the SABRE customer service center. You can view your agency options by typing PE*PCC. The PCC represents your pseudo city code. The following considerations should be discussed with SABRE.

Interface Option 6

Professional SABRE agencies use SABRE option 2 which allows for invoicing and ticketing. To enable interface, your site must be **cutover** to allow for SABRE option 6 features, which include the creation and format of Interface records. (Interface options are controlled by SABRE.)

Interface options can be flagged in your Agency profile referred to as the TJR. These options include flags to include Refunds and Exchanges, E-tickets, invoice only or invoice and itineraries for hotel updates as well as manual fare by leg information for segments not auto-priced by SABRE.

SABRE Printing Module

In most SABRE platforms, SABRE uses the Sabre Printing Module to control HOST devices such as ticket printers, invoice printers, hardcopy printers or interface records. A SABRE field services technician or SABRE hardware support desk can help you configure the utility for interface files or cable options.

Images to File

SABRE Net locations require interface configured to a file, while other platforms give you an option. When configured as a Device Type: File, Trams must have network access to the folder location named in the Device properties. Default configuration:

C:\SABRE\APPS\INTERFACE\PNRDATA.TXT
