### Professional Growth Plan

Professional Growth Plans help teachers focus on areas of professional development that will enable them to improve their practice. Teachers are accountable for the implementation and completion of the plan and may use the plan as a starting point for the school year. (The Professional Growth Plan is intended to be one academic year in duration and may support the goals of the Individual Professional Development Plan- IPDP. **The Professional Growth Plan is not intended to replace the IPDP.**) The professional growth plan and process includes feedback from the evaluator as well as the teacher's self-assessment, and the support needed to further the teacher's continuous growth and development. Professional development should be individualized to the needs of the teacher and students (based on available data), and specifically relate to the teacher's areas for growth as identified in the teacher's evaluation. The evaluator should recommend professional development opportunities, and support the teacher by providing resources (e.g., time, financial). The growth plan should be reflective of the data available and include:

- Identification of area(s) for future professional growth;
- Specific resources and opportunities to assist the teacher in enhancing skills, knowledge and practice;
- Outcomes that will enable the teacher to increase student learning and achievement.

### **The Power of Three** Lisa M. Dietlin, 2014-05-03

People often say to me You are so lucky What I tell them is that yes it might appear I am lucky What has in fact been going on is a purposeful and strategic plan of action I share that I achieve my goals by doing a little bit each day to get to where I want to go It is similar to saying you want to take a trip to the other side of the continent or world Most of us can't just say we want to do this and then as if by magic it happens Most of us have to plan the trip determining the timeframe in which it will take place schedule the time off from work save money purchase travel books etc We often find ourselves doing something each day towards this goal I have noticed though that when it comes to achieving our dreams and personal goals many of these skills so natural in planning things such as vacations don't happen naturally This book is the result of years of working in a style and with a system that I thought everyone used It was only when giving presentations and speeches did I begin to see the impact these tips were having Throughout my talks I would offer these ideas as tools to be put in the listener's toolbox so that they would have them readily accessible in the future What always amazed me was that after my presentation was done many leaders and managers would approach me saying I'm taking these ideas back to my business and having everyone do them and oh by the way do you have this in writing so I could share it I would sheepishly answer that I did not that it was simply what I did every day to achieve my goals whether in the political world nonprofit arena or in my consulting business practice Over the years the requests came often enough for me to be prompted to write this book In short The Power of Three provides helpful ideas on where to start how to do the hard things the best way to network when to seize opportunities and how listening just might be the key to it all Through reading and implementing these seemingly simple

strategies your goals and dreams both personal and professional will be attained
