Being Gifted in School Laurence J. Coleman, Tracy L. Cross, 2021-09-03 In this fully revised and expanded second edition Being Gifted in School An Introduction to Development Guidance and Teaching reviews the past developments within the field of gifted education and identifies the current trends issues and beliefs in the field This book offers the most comprehensive up to date introduction to the field of gifted education

available The authors who are nationally recognized leaders in the field discuss definitions and models of giftedness identification of the gifted teaching methods and best practices creativity counseling and guidance administrative arrangements and program prototypes and evaluation The book is geared toward educators with questions regarding curricular and instructional implementation administrators facing program planning parents with an interest in their child s educational opportunities and advanced undergraduate and graduate students curious about trends within gifted education By recognizing both typical and atypical gifted students the authors encourage readers to defy traditional assumptions about gifted children and their education *Gender and Fair Assessment* Warren W. Willingham, Nancy S. Cole, 2013-12-16 There have been many important changes in the participation of women and men in American society over the past quarter century Tests play a role in those changes by providing evidence of the diverse achievement and proficiency of women and men They aid the learning process and reflect inequalities in opportunity to learn and participate In addition they provide useful information in considering what alternatives in education and work make most sense for individuals and influence views about groups of students educational programs and a wide range of issues For all of these reasons it is important that tests assess fairly and reflect accurately the ways young people are and are not achieving as well as desired The test performance of women and men is a research topic of historical interest and has received much attention in recent years Because of this increased interest there is a great deal of new research and data available The purpose of the study presented in this volume was to review this new information with two objectives in mind to clarify patterns of gender difference and similarity in test performance and related achievements and to see what implications those findings might have for fair assessment and as a corollary examine the assessment process as a possible source of gender differences This study is interested in tests used in education to assess developed knowledge and skill In order to gain a broader view of gender similarity and difference the contributors looked at other types of measures and other characteristics of young women and men Their hope is to contribute to a firmer basis for insuring fairness in tests an objective which is particularly important as the field moves increasingly to new forms of assessment in which there is less experience *Second Handbook of Research on Mathematics Teaching and Learning* Frank K. Lester, 2007-02-01 The audience remains much the same as for the 1992 Handbook namely mathematics education researchers and other scholars conducting work in mathematics education This group includes college and university faculty graduate students investigators in research and development centers and staff members at federal state and local agencies that conduct and use research within the discipline of mathematics The intent of the authors of this volume is to provide useful perspectives as well as pertinent information for conducting investigations that are informed by previous work The Handbook should also be a useful textbook for graduate research seminars In addition to the audience mentioned above the present Handbook contains chapters that should be relevant to four other groups teacher educators curriculum developers state and national policy makers and test developers and others involved with assessment

Taken as a whole the chapters reflects the mathematics education research community's willingness to accept the challenge of helping the public understand what mathematics education research is all about and what the relevance of their research findings might be for those outside their immediate community

Congressional Record United States. Congress, 1997 The

Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in *The Debates and Proceedings in the Congress of the United States 1789-1824*, the *Register of Debates in Congress 1824-1837*, and the *Congressional Globe 1833-1873*. **The Dimensions of Time and the Challenge of School Reform**

Patricia C. Gandara, 2000-01-01. Annotation: As the education reform movement matures into its second decade, it is clear that many promising efforts have fallen short in their attempts to create real school change. One reason for this is that the process of school reform is much more complex than most reformers realized or were willing to acknowledge. *The Dimensions of Time and the Challenge of School Reform* points to another problem: the problem of time and its role in both the success and failure of school reform efforts. The importance of understanding the role that time plays in both learning and instruction and finding ways to provide time for teachers grappling with change and students learning to accommodate a new language and culture are important themes in this book. This book is directed to policymakers and practitioners as well as to academics in that it combines theory with the real world experiences of many who have been active in the school reform movement and who have learned through trial and error how to think about time in innovative ways. Book jacket *Literate Lives* Amy Seely Flint, 2007-11-09. *Literate Lives: Teaching Reading and Writing in Elementary Classrooms* invites readers to consider the complexities of the reading process in diverse settings. The text is designed to meet the challenges and needs of undergraduate and graduate teacher candidates in elementary education programs, helping them to have a better first year in the classroom experience. The text introduces teacher candidates to the notion that reading is a complex, multi-layered process that begins early in a child's life. Reading, by all accounts, is more than decoding symbols on a page. While this is one component of the reading process, it is important for teacher candidates to see a broader, more complete picture of reading. Given the role that reading plays in the elementary school curriculum, it is imperative that teachers have a well-developed understanding of the reading process and what it means to be a teacher of readers. *Literate Lives: Teaching Reading and Writing in the Elementary Classroom* covers the major theories and application strategies of the reading process as well as current debates in the field, using a unique framework that builds upon the following themes: believing that literacy is based in social, cultural, and historical contexts; assuming an inquiry stance; being problem posers and wondering why; using kidwatching (Goodman, 1985) as an assessment tool to make informed instructional decisions; recognizing and using the multiple literacies that children bring to the classroom; and lingering and reflecting on one's decisions in light of what one knows and believes. **Classroom Assessment for Students in Special and General Education** Cathleen G. Spinelli, 2006. For courses in Assessment in Special Education. Written for future teachers and experienced educators, *Classroom Assessment for Students in Special and General Education*, second edition, provides the skills needed to effectively use assessment, particularly informal assessment, in understanding the needs of the whole student. The primary text on classroom assessment

procedures is now revised with the latest in authentic curriculum and performance based assessment measures with direct connections to instruction IEP development and reporting to parents The focus is on providing teachers with a variety of assessment procedures the why what and how of testing directions on how to construct administer score interpret graph monitor write and report assessment results
