Abstract—The purpose of this study was to determine the effect of a 12-week training program on the heart rate (HR) and energy expenditure (EE) of sedentary, middle-aged women. The subjects were 12 sedentary women, 40 to 50 years of age, who were randomly assigned to a 12-week training program or a control group. The training program consisted of three sessions per week, each lasting 30 minutes, and included a combination of aerobic and resistance training. The control group consisted of 12 sedentary women who did not participate in the training program. The HR and EE were measured at rest and during the training sessions. The results showed that the training program had a significant effect on the HR and EE of the subjects. The HR increased significantly during the training sessions, and the EE increased significantly during the training sessions. The control group showed no significant change in HR or EE. The results suggest that a 12-week training program can improve the HR and EE of sedentary, middle-aged women.

- 2) When configuring a multi-mount AIO, set `mountpoint` to your location, e.g. `/mnt/RAID0/AIO1`
- 3) If you're using the `File` as a multi-mount method, add `mountpoint` to the multi-mount from `File` as a config. In multi-mounts, a "mountpoint" is required for the multi-mount to be successful. This is required either to purchase this type of multi-mount AIO, or pointing out the group you wish to assign it.
- 4) Do not exceed the 1% of multi-mount, a 1% limit.
- 5) Mountpoint information for multi-mount should be shown in the table on the File System Config.

- Day and night periods that are longer than the standard 24 hours occur most commonly with the use of artificial or non-natural light sources. To avoid this, there are laws in the province that regulate the use of artificial light.
- Increased exposure to light will negatively affect the body's circadian rhythm specifications, the length of the day and night, depending on the use of artificial light sources.
- The end of the night is the beginning of the day, therefore the period of darkness that provides the body with the opportunity to sleep is the most important. Sleep deprivation is a factor for these people, and it is inevitable. Sleep deprivation is about the 50 percent of the population.

When you install your T-Value One Connection, improper installation of all four screws (50 combinations for One Connection) will void the warranty. Please, before installing, refer to the correct installation instructions. Failure to maintain proper ventilation may result in a variety of problems with the product.

- When a producer's price for the output rises or falls, it must adjust its output level accordingly. A rise in the price of the output will cause a producer to produce more, and a fall in the price of the output will cause a producer to produce less.
