Computers Helping People with Special Needs, Part II Klaus Miesenberger, Joachim Klaus, Wolfgang Zagler, Arthur Karshmer, 2010-06-29 Welcome to the Proceedings of ICCHP 2010 We were proud to welcome participants from more than 40 countries from all

over the world to this year's ICCHP. Since the late 1980s it has been ICCHP's mission to support and reflect development in the field of Assistive Technologies, eAccessibility and eInclusion. With a focus on scientific quality, ICCHP has become an important reference in our field. The 2010 conference and this collection of papers once again fulfilled this mission. The International Programme Committee comprising 106 experts from all over the world selected 147 full and 44 short papers out of 328 abstracts submitted to ICCHP. This acceptance ratio of about half of the submissions demonstrates our strict pursuit of scientific quality both of the programme and in particular of the proceedings in your hands. An impressive number of experts agreed to organize Special Thematic Sessions (STS) for ICCHP 2010. These STS help to bring the meeting into sharper focus in several key areas. In turn, this deeper level of focus helps to collate a state of the art and mainstream technical, social, cultural and political developments.

Mobile Computing, Applications, and Services Petros Zerfos, Rebecca Montanari, Thomas Phan, 2010-06-08. This proceedings volume includes the full research papers presented at the First International Conference on Mobile Computing Applications and Services (MobiCASE) held in San Diego, California during October 26-29, 2009. It was sponsored by ICST and held in conjunction with the First Workshop on Innovative Mobile User Interactivity (WIMUI). MobiCASE highlights state of the art academic and industry research work in main topics above the OSI transport layer with an emphasis on complete end-to-end systems and their components. Its vision is largely influenced by what we see in the consumer space today: high-end mobile phones, high bandwidth wireless networks, novel consumer and enterprise mobile applications, scalable software infrastructures and of course an increasingly larger user base that is moving towards an almost a mobile lifestyle. This year's program spanned a wide range of research that explored new features, algorithms and infrastructure related to mobile platforms. We received submissions from many countries around the world with a high number from Europe and Asia in addition to the many from North America. Each paper received at least three independent reviews from our Technical Program Committee members during the Spring of 2009 with final results coming out in July. As a result of the review process we selected 15 high quality papers and complemented them with six invited submissions from leading researchers, reaching the final count of 21 papers in the program.
