CONCLUSIONS

The results of this study indicate that the use of a single, standardized, and validated questionnaire can provide a reliable and valid measure of the prevalence of occupational asthma in a large, multi-center study. The prevalence of occupational asthma was found to be 1.1% in the general population of workers in the United Kingdom. This prevalence is similar to that reported in other studies of occupational asthma in the United Kingdom and other countries. The results of this study also indicate that the use of a single, standardized, and validated questionnaire can provide a reliable and valid measure of the prevalence of occupational asthma in a large, multi-center study.
