**The Cambridge Companion to Blues and Gospel Music** Allan Moore, 2003-03-13 From Robert Johnson to Aretha Franklin Mahalia Jackson to John Lee Hooker blues and gospel artists figure heavily in the mythology of twentieth century culture The styles in which they sang have proved hugely influential to generations of popular singers from the wholesale adoptions of singers like Robert Cray or James Brown to the subtler vocal appropriations of Mariah Carey Their own music and how it operates is not however always seen as valid in its own right This book provides an overview of both these genres which worked together to provide an expression of twentieth century black US experience Their histories are unfolded and questioned representative songs and lyrical imagery are analysed perspectives are offered from the standpoint of the voice the guitar the piano and also that of the working musician The book concludes with a discussion of the impact the genres have had on mainstream musical culture

*Air Pollution in the 21st Century* T. Schneider, 1999-03-12 This symposium was jointly organized by the United States Environmental Protection Agency and The Netherlands Ministry of Housing Spatial Planning and the Environment These proceedings will provide a stimulus for taking up the challenges of environmental policy development in the 21st century and will contribute to continuing co operation Clean air is a basic condition for health Air pollution aggravates respiratory problems leading to increased sickness absenteeism increased use of health care services and even premature mortality Air pollution is under intensive discussion in the United States and Europe In The Netherlands a wide range of policy instruments have been formulated which have reduced air pollution For example since 1975 sulphur dioxide and lead emissions have been reduced However emission reduction figures for many other

substances are more modest Many air pollution problems persist because progress in countering these problems is nullified by growth in the economy and traffic Another important target is the prevention of climate change The international community is agreed that the increasing concentration of greenhouse gases in the atmosphere has led to a gradual increase in the earth's temperature In terms of the environmental consequences and social implications the greenhouse problem surpasses all other air quality problems Across Europe strategies are being developed to reduce acidification and photochemical air pollution An air emission ceiling for each country in the European Union is being agreed In the area of climate change there is good co-operation between the United States The Netherlands and other EU Members States in the ongoing global negotiations This is the start of a new movement In the last century economies and societies developed through increasing human productivity In the next century they must develop through increasing the productivity of fuel and natural resources
