How do light-dependent and light-independent reactions provide food for a plant?

Why?

Plants are the original solar panels. Through photosynthesis a plant is able to convert electromagnetic (light) energy into chemical energy. This energy is used not only to keep the plant alive, but also to sustain all creatures that rely on the plant for food and shelter. Plants and photosynthetic algae are also the source of all oxygen on Earth, allowing the inhabitants of Earth to benefit from our most plentiful renewable energy resource.

Handbook of Photosynthesis Mohammad Pessarakli, 2005-03-29 Quite naturally photosynthesis has achieved massive amounts of attention in recent years Aside from being the most spectacular physiological process in plant growth it is actually the key to our dealing with the potentially cataclysmic accumulation of carbon dioxide in the earth's atmosphere Unfortunately while information is plentiful all this attention has resulted in a scattered database on photosynthesis with no contemporary starting point at least until now With the second edition of the Handbook of Photosynthesis Mohammad Pessarakli once again fills the need for an authoritative and balanced resource by assembling a team of experts from across the globe Together they have created a comprehensive reference that in a single volume includes important background information as well as the most recent research findings on photosynthesis Completely Revised with Several New Chapters The handbook a completely updated reworking of the critically acclaimed first edition details all of the photosynthetic factors and processes under both normal and stressful conditions covering lower and higher plants as well as related biochemistry and plant molecular biology Divided into fourteen sections for ease of reference with nearly 8000 bibliographic citations the handbook contains authoritative contributions from over 80 scientists It includes approximately 500 drawings photographs tables and equations all designed to reinforce and clarify important text material **Energy for Life** Betty D.
