The instructions presented above failed all three, with one exception. There's no instruction on how to turn on the device. There's no review of instruction of how to implement gathered in the conclusion.

Then the instructions would have looked like to follow:
 3. There's no equipment needed list. That should be in the beginning of the instructions manual. With the equipment list, it could leave the reader with unanswered questions. What cord attaches to the computer to upload the recording? Questions such as that could be easily answered with an equipment list.
