Representing a wide range of disciplines biology sociology anthropology economics human ethology psychology primatology history and philosophy of science the contributors to this book recently spent a complete academic year at the Center for Interdisciplinary Research ZiF discussing a plethora of new insights in reference to human cultural evolution These scholars acted as a living experiment of interdisciplinarity in vivo The assumption of this experiment was that the scholars while working and residing at the ZiF would be united intellectually as well as socially a connection that might eventually enhance future interdisciplinary communication even after the research group had dispersed An important consensus emerged The issue of human culture poses a challenge to the division of the world into the realms of the natural and the cultural and hence to the disciplinary division of scientific labor The appropriate place for the study of human culture in this group's view is located between biology and the social sciences Explicitly avoiding biological and sociological reductionisms the group adopted a pluralistic perspective integrative pluralism that took into account both today's highly specialized and effective subdisciplinary research and the possibility of integrating the respective findings on a case by case basis Each sub group discovered its own way of interdisciplinary collaboration and submitted a contribution to the present volume reflecting one of several types of fruitful cooperation such as a fully integrated chapter a multidisciplinary overview or a discussion between different approaches A promising first step on the long road to an interdisciplinarily informed understanding of human culture this book will be of interest to social scientists and biologists alike Evidential Statistics, Model Identification, and Science Mark Louis Taper, Jose Miguel Ponciano, Yukihiko Toquenaga, Hidetoshi Shimodaira, 2022-02-15 **Te HS&T a** Holt Rinehart & Winston, Holt, Rinehart and Winston Staff, 2004-02 Identification and Ecology of Freshwater Arthropods in the Mediterranean Basin Alain Maasri, James H.
