

Student Exploration: Populations and Samples

Background: Frequency distributions describe the distribution of a population. A sample

Prerequisite Knowledge: Students should know how to graph using the Cartesian plane.

1. **Frequency Distributions:** A frequency distribution is a table or graph that shows the frequency of each value in a data set. The frequency of a value is the number of times that value occurs. The following graph shows the frequency distribution of test scores for a class of students.

2. How would you describe the shape of this distribution?

Answer: The distribution is roughly bell-shaped, but it is not perfectly symmetric. The distribution is skewed to the right.

3. On the above graph, sketch what you think the frequency distribution might look like if the scores were normally distributed. How would this differ from the actual distribution?

Answer: The distribution would be more symmetric and bell-shaped.

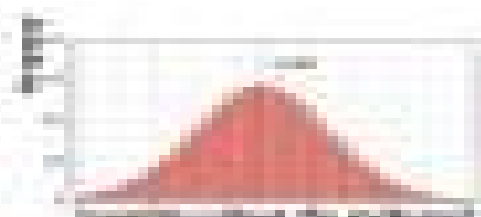

4. **Populations and Samples:** A population is a group of individuals that are being studied. A sample is a subset of the population. The following graph shows the frequency distribution of test scores for a population of students.

5. How would you describe the shape of this distribution? How would this differ from the frequency distribution of a normal distribution? (Hint: Think about the shape of a normal distribution.)

Answer: The distribution is roughly bell-shaped, but it is not perfectly symmetric. The distribution is skewed to the right.

6. How would you describe the shape of this distribution? How would this differ from the frequency distribution of a normal distribution? (Hint: Think about the shape of a normal distribution.)

Answer: The distribution is roughly bell-shaped, but it is not perfectly symmetric. The distribution is skewed to the right.
