The use of large animal models to improve pre-clinical translational research Mark Gray, Abirami Kugadas, Stefano Guido, 2023-03-30 *New Insights on the Management of Obesity with Nutrition and Physical Activity* Hassane Zouhal, Ismail Laher, Claire Tourny, Kelly Johnson, 2023-11-02 *Current and Future Role of Artificial Intelligence in Cardiac Imaging, Volume II* Steffen Erhard Petersen, Alistair A. Young, Tim Leiner, Karim Lekadir, 2023-10-30 Our first Research Topic entitled Current and Future Role of Artificial Intelligence in Cardiac Imaging provided comprehensive reviews of the recent advances and potential impact of AI for a range of cardiac imaging applications and remains available as an e book to download at no cost Since this first set of publications the field has moved at pace and it is timely to now invite further up to date and topical reviews but importantly original research articles via our Research Topic Current and Future Role of Artificial Intelligence in Cardiac Imaging 2 0 **Opportunities and Challenges of Interprofessional Collaboration and Education** Jill Thistlethwaite, Peter Musaeus, Martina Mueller-Schilling, Sophie Schlosser, 2024-04-01 Interprofessional collaboration is essential in meeting today's health challenges which demand high flexibility and innovation Many health organizations including the World Health Organization WHO demand that interprofessional collaboration should be taught and learned globally Even so interprofessional education tools have not yet been widely implemented in the curricula of medical professions incl physicians nurses pharmacists physiotherapists etc this training usually takes place separately Collaboration is necessary in health professions education as it can allow professionals to increase their skills and help them achieve more than they would at an individual level Collaboration also allows for more open minded approaches when facing new ways of thinking When knowledge is shared healthcare employees are more encouraged to share their own ideas and concerns These achievements of interprofessionalism within health profession education not only benefit the student and employee but also optimize patient care and increase patient safety Productivity can also be increased and therefore reduce costs overall Herzkatheter-Manual Raimund Erbel, 2012 **Cryptogenic Ischemic Stroke** Antonio Arjona-Padillo, Elena Meseguer, Patricia Martínez Sánchez, Laura Amaya Pascasio, 2025-10-10 Cryptogenic ischemic stroke which includes the most recent entity named embolic stroke unknown source ESUS is a medically challenging situation where even after extensive diagnostic evaluation no major cause can be determined for the stroke It is estimated that approximately one third of all ischemic strokes the most common type of stroke are classified as cryptogenic Ischemic stroke workup may include brain imaging scans like CT or MRI laboratory analysis transcranial and carotid ultrasound and or CT angiogram magnetic resonance angiogram and electrocardiogram and transthoracic echocardiogram or transesophageal echocardiography to evaluate heart embolic sources However in cryptogenic stroke these tests yield no conclusive results about the source of the clot Identifying the cause of an ischemic stroke is critical to prevent recurrent strokes and the estimated risk of recurrence of cryptogenic stroke is 30% at 10 years Therefore the treatment strategy in the absence of an identifiable case mainly involves

general stroke prevention measures including antiplatelet drugs anticoagulants or statins in conjunction with lifestyle changes like controlling blood pressure and cholesterol quitting smoking and maintaining a healthy diet and regular exercise The term cryptogenic implies ambiguity and heterogeneity prompting researchers to delve deeper to uncover hidden causative factors It s a dynamic area of investigation from exploring potential cardiac sources through prolonged cardiac monitoring Paroxysmal Atrial Fibrillation detecting embolic atrial cardiopathy and substenotic arterial diseases to examining hypercoagulable states by occult malignancy Significant progress is being made in understanding cryptogenic ischemic stroke and the unveiling of these concealed causes allows for a more targeted treatment approach ultimately leading to reduced recurrence rates and improved patient outcomes This Research Topic aims to highlight the current research on unidentified or unproven causes of ischemic stroke We welcome any types of manuscripts supported by Frontiers in Neurology pertaining but not limited to the following themes Foramen ovale in atypical population Carotid web Aortic atheroma Thrombophilia acquired or hereditary Embolic cardiopathies without atrial fibrillation Diagnostic value of potential ECG imaging and biological markers of paroxysmal atrial fibrillation Stroke associated with viral infections Embolic Stroke of Undetermined Source or ESUS
