Keegan, Mark C. Green, 2005 WHAT MAKES THIS BOOK UNIQUE Warren Keegan and Mark Green approached the fourth edition of Global Marketing with this goal To write a book that reflects current issues and events features conceptual and analytical tools that will help the reader apply the 4Ps to global marketing and is authoritative in content yet relaxed and assured in style and tone Market Entry Strategies Mario Glowik, 2010-10-01 Im ersten Teil des Buches werden einschlägige Internationalisierungstheorien vorgestellt Neben traditionellen Konzepten der Internationalisierung z B Produktlebenszyklusansatz von Vernon Uppsala Modell und Porter s Diamant Ansatz wird den moderneren Netzwerkansätzen z B Systemansatz New Venture bzw Born Global und Entrepreneurkonzepte besonderer Stellenwert eingeräumt Im zweiten Teil werden Alternativen des internationalen Markteintritts z B Exporte Franchising Joint Ventures Auftragsproduktion und Direktinvestitionen mit Bezug auf elementare Entscheidungsdeterminanten aus Sicht der Unternehmensführung wie hierarchische Kontrolle Marktnähe Investitionsrisiko und dem Faktor Zeit erörtert Im empirischen Teil des Buches werden im Resultat einer Langzeituntersuchung Fallstudien asiatischer Firmen der Konsumentenelektronikindustrie wie beispielsweise Samsung Sony Sharp Matsushita Panasonic LG Electronics und TCL China deren Organisationsstrukturen Unternehmenskulturen jeweilige Umsatz und Gewinnentwicklung sowie strategische Konzepte zur Marktdurchdringung in Europa erörtert Ein Schwerpunkt bildet die Darstellung interner z B diversifizierte Geschäftsfelder vertikale Produktionstiefe und externer Netzwerke z B Joint Ventures Zuliefer und Abnehmercluster sowie Kapitalbeteiligungen die aus Sicht des Autors wesentlich dazu beitragen dass sich asiatische Unternehmen im Vergleich zu ihren europäischen Wettbewerbern der Fernseherteilindustrie z B Grundig Thomson oder Philips in den letzten beiden Jahrzehnten wesentlich erfolgreicher am Marktpositioniert haben In diesem Zusammenhang werden Ziele Erfolgsfaktoren sowie der strategische Einfluss der involvierten Partnerfirmen einerseits in bilateralen japanischen Joint Ventures und andererseits in europäisch-asiatischen

Joint Ventures über einen Zeitverlauf von mehreren Jahren untersucht. Das Buch liefert komplexe Hintergrundinformationen zur Entwicklung des europäischen Fernsehgerätemarktes. Im Ergebnis wird unter anderem nachgewiesen, dass Unternehmen mit den intensivsten Netzwerkaktivitäten auch gleichzeitig technologische Marktführer in ihrem Segment sind. Die Weiterentwicklung der Netzwerktheorie und die ausführlichen Fallstudien mit hohem Aktualitätsanspruch der wichtigsten asiatischen Unternehmen der Konsumentenelektronikindustrie prägen den besonderen Wert dieser Publikation. Auf der Basis der gewonnenen Erkenntnisse können darüber hinaus Chancen und Risikopotentiale für andere europäische Branchen, z. B. Automobilbau, abgeleitet werden. Das in Englisch geschriebene Buch eignet sich hervorragend für Studierende international ausgerichteter Bachelor, Master und MBA Studiengänge und bietet vor dem Hintergrund eines globalisierten Wettbewerbs darüber hinaus relevante Industrieerkenntnisse für interessierte Entscheidungsträger aus Politik und Wirtschaft.

The first part of the book introduces relevant theories of internationalization. In addition to traditional concepts of internationalization, e.g. the product life cycle approach of Vernon, the Uppsala model and Porter's diamond approach, particular attention is paid to the more modern network approaches of internationalization, e.g. systems, new venture born global and entrepreneur concepts. In the second part, alternatives for international market entry, e.g. exports, franchising, joint ventures, contract manufacturing and foreign direct investments, are explained. These market entry modes are categorized according to decision determinants such as hierarchical control, proximity to the market, risk of investment and the factor of time, which are important from the point of view of the corporate management involved in international business.

The empirical part of this publication, which is the result of a longitudinal study, consists of case studies of Asian firms doing business in the consumer electronics industry. The cases of Samsung, Sony, Sharp, Matsushita, Panasonic, LG Electronics and TCL China provide fundamental insights into the firms' organizational structures, corporate cultures, respective sales volume and earnings performance, as well as strategic concepts for their market penetration in Europe. A main emphasis is placed on an understanding of internal firm networks, e.g. diversified business fields and vertical production depth, and external firm networks, e.g. joint ventures, supplier and buyer clusters, as well as mutual capital interests. From the author's view, these network grids fundamentally contribute to the fact that Asian firms have more successfully positioned themselves in the market within the last two decades compared to their European competitors in the television set industry, e.g. Grundig, Thomson or Philips.

The networking aims and success factors, as well as the changing strategic influence over the years of the partner firms, both in bilateral Japanese joint ventures and in European-Asian joint ventures, are examined. The book provides complex background information about the development of the European television set market. The analysis demonstrates that firms holding the position of technological market leaders in their segment simultaneously indicate the most intensive network activities. The further development of the network theory and the detailed and up-to-date case studies of the most important Asian enterprises in the consumer electronics industry contribute to the value of this publication. Furthermore, on the basis of the knowledge gained from this study, chances and risk

potentials can be derived for other European industries e.g. automotive The book written in English is suitable for internationally oriented bachelor's, master's and MBA programs Additionally, against the background of worldwide competition, the publication at hand offers relevant industry insights for interested political and economic decision makers
