Philosophy Of Guidance Essays:

Essays in Philosophical Synthesis Nicholas Rescher, 2023-09-02 This book presents a series of coordinated studies that explain and illustrate how philosophy must be developed systematically with its problems and topics bound together by links of reciprocal interconnection The book consists of two parts The first part consists of a series of case studies which illustrate how philosophical issues do not remain in neatly separated compartments but reach out in interrelationship with one another The second part analyzes the principle resources of philosophical methodology and shows in detail how and why they can only be implemented in a systemically interrelated manner Overall the book demonstrates and illustrates the systemic and holistic nature of philosophical inquiry *Essays on Some Theological Questions of the Day* Henry Barclay Swete, 1906 An Essay on African Philosophical Thought Kwame Gyekye, 1995 In this sustained and nuanced attempt to define a genuinely African philosophy Kwame Gyekye rejects the idea that an African philosophy consists simply of the work of Africans writing on philosophy It must Gyekye argues arise from African thought itself relate to the culture out of which it grows and provide the possibility of a continuation of a philosophy linked to culture Offering a philosophical clarification and theology and ethics of the Akan of Ghana Gyekye argues that critical analyses of specific traditional African modes of thought are necessary to develop a distinctively African philosophy as well as cultural values in the modern world **Essays and Notices** Thomas Whittaker, 1895 *Essays* Plutarch, 2006-01-26 One of the greatest essayists of the Graeco Roman world Plutarch c AD 46 120 used an encyclopedic knowledge of the Roman Empire to produce a compelling and individual voice In this superb selection from his writings he offers personal insights into moral subjects that include the virtue of listening the danger of flattery and the avoidance of anger alongside more speculative essays on themes as diverse as God s slowness to punish man the use of reason by supposedly irrational animals and the death of his own daughter Brilliantly informed these essays offer a treasure trove of ancient wisdom myth and philosophy and a powerful insight into a deeply intelligent man Essays on Beauty and the Arts Bernard Bolzano, 2022-12-12 Bernard Bolzano s 1781 1848 writings in aesthetics are clear concise and explicit about method Provocative and revisionary they champion broad views of beauty the arts and their social function Dominic McIver Lopes s introductory materials place Bolzano s essays in context give them a new interpretation and map out how to teach them in full or in part in a variety of courses **The Essays (I-LVIII) Or, Counsels Civil and Moral of Francis, Lord Verulam, Viscount St. Albans** Francis Bacon, 1879 Seven Essays on the Genealogy of Uncertainty Stephen Nash, Liza Rybak, 2024-09-30 Uncertainty is critical to economic theory mainly because it either supports or undermines many significant debates within economic theory Despite the significance of uncertainty this book represents the first attempt to comprehensively trace the genealogy of uncertainty which is a procedure that Nietzsche used in relation to morality one of the subjects that become logically redundant in the absence of uncertainty On the one hand this logical redundancy is problematic when considered in isolation given the practical importance of morality On the other hand this

logical redundancy becomes even more problematic given that at one time uncertainty was widely accepted as an important part of the philosophical system. Here uncertainty played a pivotal role in terms of explaining practical decision making. Such an appreciation of uncertainty has recently been set aside by modern philosophy which argues quantities of human labour provide virtually all economic value. Such an explanation of economic value excludes uncertainty, the many qualitative contributions of nature and morality even when one acknowledged the contribution to the understanding of uncertainty as proposed by Frank Knight in 1921. However, in contrast to Knight who looked toward recent philosophy so as to support the existence of uncertainty, this genealogy looks to support the significance of uncertainty by understanding the philosophy that supported the idea of uncertainty for thousands of years before the philosophy of John Locke. Specifically, Locke excludes uncertainty from the analysis of practical decision making in general and from economic decision making in particular. Accordingly, it can be anticipated that the enclosed genealogy will assist economists to more adequately develop the idea of uncertainty within economic theory.

The Arc of the Moral Universe and Other Essays Joshua Cohen, 2010. In this collection of essays, Joshua Cohen locates ideas about democracy in three far ranging contexts. First, he explores the relationship between democratic values and history. He then discusses democracy in connection with the views of defining political theorists in the democratic tradition: John Locke, John Rawls, Noam Chomsky, Juergen Habermas, and Susan Moller Okin. Finally, he examines the place of democratic ideals in a global setting, suggesting an idea of global public reason, a terrain of political justification in global politics in which shared reason still plays an essential role. All the essays are linked by his overarching claim that political philosophy is a practical subject intended to orient and guide conduct in the social world. Cohen integrates moral, social, scientific, and historical argument in order to develop this stance, and he further confronts the question of whether a society conceived in liberty and dedicated to equality can endure. At Gettysburg, President Lincoln forcefully stated the question and expressed both hope and concern over this same struggle about an affirmative answer. By enabling us to trace the arc of the moral universe, the essays in this volume, along with the companion collection *Philosophy, Politics, Democracy*, give us some reasons for sharing that hope.

Essays on Kant, Schelling, and German Aesthetics Henry Crabb Robinson, 2010. As a student at the University of Jena at the beginning of the nineteenth century, Henry Crabb Robinson (1775–1867) became the outstanding English mediator of the revolution in German thought. For the first time, this volume collects his early writings, both published and unpublished. The contents include Letters on the Philosophy of Kant and notes from F. W. J. Schelling's lectures on the philosophy of art. Further, Robinson's private lectures for Madame de Staël are presented with her marginalia. In the intellectual history of Romanticism, Robinson emerges as a major figure whose lucid and entertaining essays can still guide the modern reader through the key German texts.
