thought illuminates basic philosophical concepts through literary works. This unique text introduces students to philosophy through the medium of great literature. The book is divided into seven parts, each devoted to the illumination of a basic philosophical concept such as Knowledge, Truth, Personal Identity, Ethics, and justice through the use of literary selections from Sophocles' *Oedipus the King*, James Joyce's *Araby*, Kafka's *The Metamorphosis*, and John Dos Passos' *The House of Morgan*, among many others. The editors have given special attention to choosing the right combination of literary piece and philosophical issue to ensure that the story or play lends itself to philosophical scrutiny. Selections of the best philosophical writings. The questions raised by these selections are then explored further through some of the best philosophical writings available, including the writings of Aristotle, William James, Plato, Locke, John Stuart Mill, and many other classic philosophers as well as contemporary pieces from Richard Rorty, Peter Unger, John Rawls, John Hick, and others. In each chapter, the editors have attempted to include the clearest presentation of a particular point of view, sometimes going back to an earlier article not generally found in other current texts. Throughout, they have made an effort to balance the analytic tradition with hermeneutics and feminist philosophy. Excellent introduction for students. Every chapter is introduced with an essay by the editors that provides a unifying thread through the various philosophical and literary pieces that follow. Each chapter ends with discussion questions and suggestions for further study. The result is a volume that will provide students with a valuable tool for illuminating timeless as well as contemporary issues and an introduction to philosophy that they will remember and to which they can return over and over again.

An Introduction to Philosophy (Classic Reprint) W. Windelband, 2017-12

Excerpt from *An Introduction to Philosophy*: The Introduction to Philosophy which I here offer to the public gives a general view of philosophical problems and explains the tendencies of the various attempts to solve them. It seeks to provoke the reader to think over the great problems of life. It is in no sense an introduction to a special philosophical system, but it makes a very wide survey of all the possibilities in the way of solutions. Naturally, it is based upon the author's personal view, as the student of philosophy will easily perceive, but this will not be pressed or suffered to influence the author's judgment in appraising other systems of thought. In view of the aim of the work, I have not found it necessary to burden it with literary references to the historic systems to which reference is made in its pages.
