Operative Manual of Endoscopic Surgery 2 A. Cuschieri, G. Buess, J. Perissat, 2013-11-11 The second volume of Operative Manual of Endoscopic Surgery covers some of the operative endoscopic procedures which have been introduced into clinical practice since the publication of Vol 1 In the general section we have included an updated chapter on instrumentation and new chapters on anaesthetic management of patients undergoing endoscopic surgery and on video image and recording Both topics are of importance to the practice of endoscopic surgery and have not been adequately covered in the reported literature Volume 2 deals with endoscopic procedures in the chest and abdomen There have been significant advances in thoracoscopic surgery during the past 2 years particular references made to anatomical pulmonary resections and oesophageal resections As far as the gastrointestinal tract is concerned we have included gastric and allied operations but have not covered the colorectal region as we believe that more evaluation is needed before definitive accounts can be written on endoscopic colorectal resections especially for cancer For this reason we have decided to defer this important topic to Vol 3 which is in preparation The same applies to laparoscopic repair of abdominal hernias The same layout has been adopted as in Vol 1 of the series with heavy emphasis on illustrative representation of the operative steps and techniques In the diagrams on sites of trocar cannulae we have indicated not only the site and size but also the functional role of each port

Stephens MHA,2018-03-03 I wrote this e book paperback edition to help all of the people out there with a CPAP machine or in the process of getting a CPAP machine I have been working for over 20 years with CPAP patients and their families I have been fortunate to setup over 1000 patients in their home my office and on occasion in the hospital In my opinion there are numerous patients that are not getting the correct initial therapy or maintenance therapy they deserve during their treatment of their sleep apnea The primary reasons I have noticed are the following 1 There are many home equipment companies that just want to make a buck patient care is not there number one goal 2 There are companies that don t have the experienced staff needed to manage CPAP therapy Minimally a trained Respiratory Therapist or Registered Nurse is the only person s that should be setting up your CPAP 3 Lots of the patients do not completely understand how dangerous untreated sleep apnea can be Some primary doctors are not explaining the seriousness of sleep apnea effectively or unable to explain it to the patients in a manner they the patient would truly understand **Clymer Polaris Sportsman 400, 450 & 500, 1996-2010** Ed Scott,2010
