Foster Children, Rights and the Law Matthew Trail, 2025-03-31 This book discusses child wishes rights and participation in the foster care system Making decisions in a foster child s best interest is a widely used but also widely criticized international legal doctrine This work discusses the two major legal frameworks best interest and normalcy for which foster care decisions are made and how those frameworks might shape how child welfare professionals view and interpret children s rights and participation Normalcy the idea that decisions should promote a normal life is a separate legal doctrine which can be in conflict with best interest determinations However the concept of normalcy is also theoretically built into best interest decisions and therefore also plays a role in most child welfare systems Mixing both empirical legal and child welfare research the book demonstrates the ways in which risk aversion and fear drive best interest decision making to the detriment of both practitioners and the

children they aim to serve It argues that a children s rights framework starting with normalcy is a better tool for promoting child participation and centering the child within the dependency process The book will be of interest to academics researchers and policymakers working in the areas of children s rights law child welfare and international human rights law

Becoming a Trainer in Adult Abuse Work Jacki Pritchard,2001 This work deals with a comprehensive range of issues including a selection of trainers and practicalities such as venue equipment refreshments and policy law and evaluation and difficult issues ranging from disclosure and confidentiality to lack of confidence and time management
