Innovation, Entrepreneurship and Sustainability Norbert Grünwald, 2015-06-03 The ICEBE conference in Windhoek is the sixth in a series of annual conferences on engineering and business education. It is organized by the Robert Schmidt Institute University Wismar, hosted by Polytechnic of Namibia and co-organised by University of Applied Sciences Jena. The conferences were held in Sibiu, Romania; Manila, Philippines; Cape Town, South Africa; and Wismar, Germany. The theme of the Windhoek Conference is Innovation, Entrepreneurship and Sustainability, which describes the emphasis that is laid on always using these three terms in combination, i.e. not to consider one in isolation from the others. Thus the primary target of this conference is to provide the delegates with cross-disciplinary thinking related to the three main streams in engineering and business education.

Sustainability in Developing Countries Susan Osireditse Keitumetse, Luc Hens, David Norris, 2020-10-08 This book illustrates an alternative approach to state of sustainability reporting by presenting cross-sectoral and multi-disciplinary discussions on sustainability issues in the context of a developing country, Botswana. The book volume illustrates how academic publishing can supplement African governments' existing forms of reporting on sustainability by providing on-ground detailed descriptions and experiences relating to achievement of the various sustainable development goals (SDGs). In addition, this process involves increasing and enhancing the diversity of stakeholders that report on sustainability. Furthermore, the approach resonates with the UN's recommendation to build local strategies for implementation of the 2030 agenda for sustainable development. Conventional reporting on sustainability by most African countries is an exercise that is customarily the preserve of designated government ministries. While this form of reporting provides a consistent platform for tracking sustainable development goals, it can also benefit from juxtaposition with in-depth descriptions and experiences provided by academic publishing. Academia through publishing provides a framework for on-ground situation analysis as well as in-depth descriptions of African countries' grass-root experiences, thus allowing for temporal tracking of sustainable development milestones. As this volume illustrates, experiences from the various contributors on this volume highlight different points of departure towards achieving the 2030 agenda. Topics covered include biodiversity, water management, world heritage, environment, education, tourism, gender, institutional approaches to achievement of SDGs.
