

The figure below shows the three types of survivorship curves.

Label	Type I, II, or III?	Description of strategy	Example organisms that use this strategy
A	Type I	Organisms have very low offspring and take very good care of them to ensure their survival. High survival at young, decreases as they age.	Large mammals (ex. humans, elephants, horses, whales, whales)
B	Type II	Organisms equally likely to die at any point throughout their life.	Small mammals (ex. Squirrels), Fringing birds, Lizards
C	Type III	Organisms have many offspring and do not invest much care to ensure they survive.	Fish Some insects Some plants

What is meant by population distribution?

To illustrate the three main population distribution patterns could be seen in the table below:

Type of distribution	Picture of distribution	Why use this pattern?
Clumped		VERY COMMON Safety in numbers, social interactions, mating and caring for young, resources are clumped.
Dispersed		Scarcity of resources, variability.
Random		VERY COMMON It's messy (ex. food is taken by birds, but birds are prevented so humans benefit).
