The following passage is a partial student

A Case for the Four-Day School Week

(1) The design of modern American
schools is based on an industrial-era
model of mass reproduction. Times have
changed. The most change, public
schools in the United States should
switch to a four-day week.

(2) It makes fiscal sense to scale
our school schedule. The proposal of
running a school one day less on
single day, every single elementary
school runs between five and four
student days at school. Just one
student day at school of 200 students
would save \$100,000 a year. A school
with 1,000 students would save \$1 million a year. A school with 2,000 students would save \$2 million a year. A school with 4,000 students would save \$4 million a year.
