Abstract—The purpose of this study was to determine the effect of a 12-week training program on the heart rate (HR) and energy expenditure (EE) of sedentary, middle-aged women. The subjects were 12 sedentary women, 30 to 45 years of age, who were randomly selected from a telephone directory. The subjects were divided into two groups: a control group and an exercise group. The control group consisted of six women who did not exercise, and the exercise group consisted of six women who exercised for 12 weeks. The exercise group was instructed to exercise for 30 minutes, three times a week, at a heart rate of 150 to 160 beats per minute. The control group was instructed to remain sedentary. The subjects were monitored for 12 weeks. The HR and EE were measured at the beginning and end of the 12-week period. The results of the study showed that the exercise group had a significant increase in HR and EE compared to the control group. The HR of the exercise group increased from 145 to 155 beats per minute, and the EE increased from 1,800 to 2,200 kcal per day. The HR of the control group remained at 145 beats per minute, and the EE remained at 1,800 kcal per day. The results of this study suggest that a 12-week training program can increase the HR and EE of sedentary, middle-aged women.

If you are not satisfied with your results, follow the instructions carefully and test your original article. If the editor still requests the (a) paragraph and (b) and (c) paragraphs, repeat the analysis with the original data. The original data are available.

23. When configuring a multi-mount AFS, set `mountmnt` to your Netatun path: `mountmnt=/usr/bin/netatun`
24. If you're using the `afs` multi-mount method, add `afs` to the `mountmnt` path: `mountmnt=/usr/bin/netatun/afs`. In this scenario, a "Warning" message will appear after the configuration is successful. This message will refer to a path that does not exist. This is expected. The message will refer to the path that the `afs` multi-mount will be pointing to (the `afs` group at `/usr/bin`).
25. Do not reboot the FS or issue `mount -a` or `fsck` commands.
26. When you're finished, you will need to add `afs` to the `mountmnt` path: `mountmnt=/usr/bin/netatun/afs`.
