Heath,Sandra M. Sulik,2010-06-03 Despite the common perception that medicine is becoming specialty driven there are many reasons for primary care providers to offer women s health procedures in an office setting Women feel more comfortable having procedures done by prov ers whom they already know and trust Continuity of care is still valued by patients who trust their primary care providers to work with them as collaborators in the decision making process Women have found that their options for care have become limited not by their own decision but by the lack of training of their p vider In rural areas the barriers of time expense and travel often prevent many women from obtaining necessary care yet many of the procedures that these women are requesting are relatively easy to learn Positive experiences are shared by women who then refer friends and family by word of mouth This book has been designed to assist not only the clinician performing the pro dures covered but also the office staff with setting up the equipment tray prior to p forming the procedure and with preparing office documents and coding information needed to complete the procedure Most procedures covered can be done with a mi mum investment in equipment and require minimal training **Kinn's The Medical Assistant - E-Book** Deborah B. The Practice of Strategic Environmental Assessment Riki Therivel, 2013-10-11

The practical application of strategic environmental assessment (SEA) is becoming increasingly common. A growing number of SEAs are being undertaken around the world and several countries have issued guidance on how these should be carried out. However, few countries as yet have formal SEA regulations and few completed SEAs have demonstrated all the elements of current best practice. The Practice of Strategic Environmental Assessment aims to provide a unique analysis of SEAs which have been undertaken, drawing on a variety of methods and circumstances to illustrate how best practice can be achieved and providing inspiration for those considering studying, commissioning or carrying out an SEA. Part I sets the rest of the book in context, giving a review of international SEA guidance and regulations and discussing models and methodologies. Part II then analyses a comprehensive set of case studies from countries which have extensive experience in SEA or which provide particularly good examples. The case studies are discussed in three sections: sectoral SEAs, SEAs of land use plans, and SEAs of policies, and provide examples of different scales and approaches as well as country-specific experience. The final chapter draws out some constraints to effective SEA as well as positive themes which show how effective SEA can contribute to wider environmental assessment. Written by an international team of SEA practitioners and experts, this volume will be of particular use to students of environmental policy.
