In light of our contributions, and any other progress concerning these issues, future scholars are asked to contribute further to a full understanding of the issues that pervade the field of management and organizational behavior. These findings have important implications for the design of the training program. The results suggest that the training program should be designed to address the specific needs of the participants, such as the need for information on the legal and ethical aspects of the profession, and the need for information on the current state of the profession. The results also suggest that the training program should be designed to be interactive and to provide opportunities for participants to practice their skills and to receive feedback from the trainers.
