Analysing Underachievement in Schools Emma Smith, 2005-06-09 Underachievement in school is one of the most widely used terms in education today. As a discourse it has been responsible for influencing government policy, staffroom discussions as well as the pages of academic journals and the TES. It is also a subject which raises questions about what we expect from a fair and equitable education system. This book provides a critical analysis of two sides of the underachievement debate at each of the three levels of focus: international, the UK and the individual. On the one hand it will consider the crisis account of falling standards and failing pupils and on the other present an alternative account which urges a re-evaluation of the underachievement debate in order to consider who might be underachieving and why. A Compendium of Neuropsychological Tests Elisabeth Sherman, Jing Tan, Marianne Hrabok, 2023-04-25 The Compendium is an essential guidebook for selecting the right test for specific clinical situations and for helping clinicians make empirically supported test interpretations. BL Revised and updated BL Over 85 test reviews of well known neuropsychological tests and scales for adults BL Includes tests of premorbid estimation, dementia screening, IQ, attention, executive functioning, memory, language, visuospatial skills, sensory function, motor skills, performance validity and symptom validity BL Covers basic and advanced aspects of neuropsychological assessment including psychometric principles, reliability, test validity and performance, symptom validity testing. *Digital Skills and Life-long Learning: Digital Learning as a New Insight of Enhanced Learning by the Innovative Approach Joining Technology and Cognition* Dina Di Giacomo, Pierpaolo Vittorini, Pilar Lacasa, 2019-03-01 Recently, technology and aging have been key research areas in human cognition. The Research Topic 'Digital Skills and Life-long Learning: Digital Learning as a New Insight of Enhanced Learning by the Innovative Approach Joining Technology and Cognition' investigated technology's impact on cognitive and intellectual processes, highlighting how intensively technology can change and/or enhance cognitive functioning throughout one's lifespan. The aim of this Research Topic was to provide an outlook through multidisciplinary research and development while addressing the dynamic intersection of cognition, mind and technology. Our scope was 1) to favor the cognitive technology debate, 2) to overcome the dichotomies of technology and psychology, 3) to emphasize the advances in knowledge and well-being. This Research Topic comprises review studies and original articles focused on digital skills that enhance human potential. Transversal approaches and cross-sectorial analysis were encouraged, leading to investigation areas related to cognitive and mental processing in educational rehabilitation, clinical settings, across aging. Articles of high relevance to the Research Topic were submitted on the subjects of a research in human performance and human factors, b) new research and technologies addressing the needs of a growing populace and c) cognitive aging and cognitive rehabilitation research. Fundamentals of Gifted Education Carolyn M. Callahan, Holly L. Hertberg-Davis, 2013 The field of gifted education is characterized by a confusing array of perspectives concerning such fundamental issues as definition, philosophy, curriculum, social and emotional development and underserved populations. The

mission of this book is to provide a coherent framework that instructors and service providers can use in planning effective programs providing appropriate counseling services and evaluating programs for the gifted. Most sections are organized around fundamental issues confronting the field and follow a common structure: an introductory chapter that provides historical and theoretical background and organizing questions followed by several point of view chapters written by experts that provide varied perspectives on the topic at hand. Distinguishing Features: Comprehensive Coverage. The book's forty-five manageable length chapters cover the full range of topics that must be considered in planning programs and services for gifted students both within and outside of school. Coherent Structure. Section introductions provide background information and organizing questions to guide chapter authors who provide varying views of the issue at hand. The emphasis is not on the right way or the wrong way except when clearly documented bad practice is discussed but on how best practice stems from well informed and logical decision making. Decision Making Focus. The book's introductory chapter addresses the need for a clearly developed and consistently applied set of values to guide decision making. Likewise each section introduction includes a decision making framework regarding some aspect of educating, counseling or parenting gifted students. This book is appropriate for introductory level courses in gifted education or courses in program development and planning. It is also suitable for school personnel responsible for making program planning decisions in the area of gifted education and for academic libraries with holdings in this area.
