Handbook of Educational Ideas and Practices (Routledge Revivals) Noel Entwistle, 2015-08-11 First published in 1990, the Handbook of Educational Ideas and Practices was written for practitioners and students in the field of education and its related services and was designed to appeal to educationists no matter what their nationality. Focusing mainly on compulsory schooling, it provides summaries of the thinking, research findings and innovative practices current at the time. However, the book is also careful to present a complete picture of education and therefore includes a separate section for education beyond school which covers pre-school level, post-secondary level and adult and continuing education. There are also other chapters dealing with aspects of organization, curriculum and teaching in various forms of tertiary education. Indeed, each topic has been discussed by an acknowledged expert writing in sufficient detail in order to resist trivialization.

Delhi's Education Revolution Kusha Anand, Marie Lall, 2022-09-26 In 2015 the Aam Aadmi Party (AAP) was elected to govern Delhi, promising to improve public services including education through government schools that would be the equal of private school provision. Media reports along with the party's re-election in 2020 suggest strong public confidence that AAP are delivering on that promise. But is this success reflected by experience in schools? Delhi's Education Revolution offers a critical evaluation of the AAP's education reforms by exploring policy and practice through the eyes of one key group: the government school teachers tasked with making the AAP's pledge a reality. Drawing on 110 research interviews conducted via Zoom during the Covid pandemic in the summer of 2020, teachers explain how the reforms have changed their profession and practice and whether education really has improved for children of all backgrounds. Analysis of views about critical issues such as inclusion and the pressure of achievement targets in classrooms that often contain more than 50 students informs their observations about the reform programme itself. The study paints a more qualified picture of success than suggested elsewhere and makes a valuable contribution to the understanding of education reforms in India and most especially in Delhi.
