

# English Research Paper: Overview

## Objective One

**Distributed: Wednesday, February 2, 2011**

**Due: Friday, February 4, 2011**

The English Research Paper is the culminating project and assessment of all the writing, reading, and research techniques you have accumulated throughout the course of the year. This vital and pivotal piece of the curriculum affords an opportunity to demonstrate the ability to read, write, speak, apply knowledge, problem solve, and use a myriad of life skills such as time management, organization, and risk-taking and will occur from March until May. The two (2) components of the project are as follows:

### **Research Paper**

The student will self-select and research a topic in which he/she has an interest. The culmination of the research work is a 1250 word (4-5 text pages) research paper organized around a clearly stated thesis and adhering to standard documentation forms (MLA Handbook) and standard manuscript guidelines. Submitted in the fourth marking period, the research paper and standard manuscript grades will appear in the student's fourth marking period Assessment category of grades. The paper will count for 200 points in the Assessment category. **The paper is due on Friday, April 15, 2011 and must be posted on turnitin.com.**

### **Oral Presentation and Defense**

The student will present his/her project to the class. This is not a reading of the paper but a dynamic presentation of the work using visual aids, constructed models, videos, or any other approved media. The student must interact with the class and teacher during the presentation. The Oral Presentation will take place during the fourth marking period and will be reflected in the fourth marking period Assessment categories of grades. The speech will count for 200 points in the Assessment category. **The presentations will take place from May 17-20, 2011.**

### **Note**

In order for this process to be a successful learning experience, this Objectives Packet enables the student to approach this project in a measured way, with each component having a separate due date. Language, research, speaking, and writing assignments given to students during the course of the semester afford opportunities to practice and to perfect further the skills necessary to successfully meet the objectives required to successfully complete the research paper. Students and parents should note that students and their families can locate information, extra copies, and models for all of the needed research requirements on our class website.

Although we will have many opportunities to visit the library in school and to work on writing during class, students are expected to work independently at home and during study halls, if needed. Please also consider that academic programs will still be occurring; therefore, students should manage their time wisely in order to prepare for quizzes, exams, and other academic responsibilities that may be unrelated to the research project.

**Handbook on Writing Research Paper in Social Science Using Advance Tools** ,2022-10-31 The book has well turned out to be a boon for researchers from academia as well as industry The book seemly meets the requirement and encounters the dilemma of a first time researcher in many ways The basics of research paper writing are taken well care in the previous editions of the handbooks as proceedings published by Prestige Institute of Management and research Gwalior The previous editions focused on steps to carry out review of literature setting objectives developing hypothesis selecting appropriate methods as per objectives drawing inferences followed by referencing styles The book not only provides insights to a first time researcher but also introduces them with the latest tools Part one of the book presents introduction to E views as Chapter 1 The chapter deals with step wise procedure to work with E views elaborately E Views is widely used numerous econometric analyses along with statistical analysis E views provided analysis like cross section time series estimates and forecasts as well as does panel data analysis simultaneously Chapter 2 is modestly written to introduce Mendeley to the researcher Mendeley is expedient for copious objectives like conducting systematic literature review research gap identification setting objectives thereafter and more over provides a most vital efficacy to manage research papers in a stress free manner Mendeley is widely used amongst researchers across the globe as a referencing tool as well providing competence to incorporate any style of referencing within fraction of seconds Thus taking research on next level Part two of the book contains twelve research papers covering diverse domains like finance marketing HR and IT The research papers are the sample papers exhibiting the concepts of writing a well structured paper and elaborating the procedures to be followed while writing a research paper The research papers included in the book are developed during the Five Day National Research Methodology Workshop organized by Prestige Institute of Management and research Gwalior The paper writing work was divided into before during and after phases Topic finalization measure development review of literature and data collection was done before the initiation of workshop among the teams of registered participants The entire methodology application of data analysis tools and discussion was done during the workshop Post workshop i e the after phase was exclusively dedicated for strengthening the review of literature discussion of results and referencing followed by improvement in the overall structure and language of the research paper We hope the efforts put in the book will surely help readers

**Writing Human Factors Research Papers** Don Harris,2016-12-05 Writing high quality papers suitable for publication within international scientific journals is now an essential skill for all early career researchers their career progression and the reputation of the department in which they work depends upon it However many manuscripts are rejected or sent back for major re working not because the science they contain is in any way bad but because the same problems keep occurring in the way that the material is presented It is one thing to write a good scientific paper however it is quite another thing to get it published This requires some additional nous In writing this book Don Harris draws upon nearly

a quarter of a century of experience as an author and reviewer of research papers and ultimately as a journal editor By his own admission it contains all the things he wished that his mentors had told him 25 years ago but didn't The material in the book is drawn from many years of finding all these things out for himself usually by trial and error but mostly error The text adopts a much lighter touch than is normally found in books of this type after all who really wants to read a book about writing research papers The author describes his own unique approach to writing journal papers which in his own words has proved to be extremely successful All major points are illustrated with examples from his own published works The book is written in the form of a manual for constructing a journal manuscript read a chapter write a section However the material it contains goes beyond just this and also describes how to select a target journal the manuscript submission process what referees are looking for in a good journal paper and how to deal with the referees comments Each chapter concludes with a checklist to ensure all the key elements have been addressed

### **Writing and Publishing a Scientific Research Paper**

Subhash Chandra Parija,Vikram Kate,2017-07-28 This book covers all essential aspects of writing scientific research articles presenting eighteen carefully selected titles that offer essential must know content on how to write high quality articles The book also addresses other rarely discussed areas of scientific writing including dealing with rejected manuscripts the reviewer's perspective as to what they expect in a scientific article plagiarism copyright issues and ethical standards in publishing scientific papers Simplicity is the book's hallmark and it aims to provide an accessible comprehensive and essential resource for those seeking guidance on how to publish their research work The importance of publishing research work cannot be overemphasized However a major limitation in publishing work in a scientific journal is the lack of information on or experience with scientific writing and publishing Young faculty and trainees who are starting their research career are in need of a comprehensive guide that provides all essential components of scientific writing and aids them in getting their research work published
