

7.3.1. Retrofitting an additional battery

Do not connect Batteries with a capacity over 100 Ah directly to the vehicle's electrical system due to potential damage to the basic vehicle.

We recommend the use of lead-antimony batteries fitted in the location provided in the engine compartment.

Location of the auxiliary battery

1 Auxiliary battery
Arrow Front of vehicle

Additional batteries must be connected to the vehicle on-board electrical system using a suitable cut-off relay and fuse. You can obtain more information and a design proposal from the department responsible. When installing an additional battery, ensure that the same type of battery is used as the starter battery.

If the auxiliary battery is located in the passenger compartment, battery gases must be vented to the outside via a central vent hose.

The auxiliary battery must only be fitted in conjunction with a cut-off relay and fuses suitable for the charge current.

If the additional battery is installed in the passenger compartment, a ventilation system of adequate size must be installed to transport any gases released to the atmosphere via a central degassing hose.

The auxiliary battery may only be used to power auxiliary components such as the auxiliary heating.

loading aids or electrical equipment in motor caravans (fridge, etc.).

If the vehicle is already equipped with one additional battery, no more additional batteries may be connected in parallel without a charging current limitation system. This can be implemented by means of additional electronics. The body manufacturer must ensure that the maximum charging current for both additional batteries is 40 A. If this is not the case, the basic vehicle may be damaged. A suitable alternator must be selected to ensure that the overall charging balance is positive

7.3.2. Battery maintenance and storage

Batteries must be checked regularly for voltage loss (self- discharge) even when removed. Only the electrolyte level check is not required with low-maintenance batteries.

You will find information on battery maintenance and storage in the "Planning of bodies" section (→ Chapter 4).
