Authors and Subjects ,1880 **Official Register** United States Civil Service Commission,1897 **Transport in Plants III** C.R. Stocking,U. Heber,2012-12-06 The problems associated with the movement of water and solutes throughout the plant body have intrigued students of plants since Malpighi s conclusions in 1675 and 1679 that nutrient sap flows upward and downward in stems through vessels in both wood and bark Steven Hale s ingenious experiments on the movement of water in plants in 1726 and Hartig s observations of sieve tube exudation in the mid 19th century set the stage for continued intensive studies on long range transport in plants In spite of this interest for more than 200 years in the movement of solutes and water in plants it has only been within the last 20 to 30 years that extensive research effort has been directed toward a critical evaluation of the interactions among the various cellular organelles The important roles played by the exchange of metabolites in the control and regulation of cellular processes is now widely recognized but in most instances poorly understood **Index-catalogue of the Library of the Surgeon-General's Office, United States Army** Library of the Surgeon-General's Office (U.S.),1889 **The Use of Hereford** Mr William Smith,2015-10-28 The Use of Hereford a local variation of the Roman rite was one of the diocesan liturgies of medieval England before their abolition and replacement by the Book of Common Prayer in 1549 Unlike the widespread Use of Sarum the Use of Hereford was confined principally to its diocese which helped to maintain its individuality until the Reformation This study seeks to catalogue and evaluate all the known surviving sources of the Use of Hereford with particular reference to the missals and gradual which so far have received little attention In addition to these a variety of other material has been examined including a number of little known or unknown important fragments of early Hereford service books dismembered at the Reformation and now
