Galanakis,2020-11-18 Environmental Impact of Agro Food Industry

and Food Consumption covers trends associated with the impact of food production on the environment using lifecycle analysis and the standard methods used to estimate the food industry's environmental impact. The book discusses city scale actions to estimate the environmental impact of food systems including the meat chain, feeding crops to farmed fish, the confectionary industry, agriculture, tea processing, cheese production, the dairy industry, cold chain and ice cream production. Food waste and consumption in hospitality and global diets round out these interesting discussions. Written for food scientists, technologists, engineers, chemists, governmental regulatory bodies, environmentalists, environmental technologists, environmental engineers, researchers, academics and professionals working in the food industry, this book is an essential resource on sustainability in the food industry. Addresses all levels of the food chain. Provides solutions for the food industry to estimate and reduce environmental impact. Assists members of the food industry in optimizing their current performance and reducing their environmental footprint. *Climate Change 2022 – Impacts, Adaptation and Vulnerability*

Intergovernmental Panel on Climate Change (IPCC), 2023-06-22. The Working Group II contribution to the Sixth Assessment Report of the Intergovernmental Panel on Climate Change. IPCC provides a comprehensive assessment of the scientific literature relevant to climate change impacts, adaptation and vulnerability. The report recognizes the interactions of climate ecosystems and biodiversity and human societies and integrates across the natural, ecological, social and economic sciences. It emphasizes how efforts in adaptation and in reducing greenhouse gas emissions can come together in a process called climate resilient development which enables a liveable future for biodiversity and humankind. The IPCC is the leading body for assessing climate change science. IPCC reports are produced in comprehensive, objective and transparent ways ensuring they reflect the full range of views in the scientific literature. Novel elements include focused topical assessments and an atlas presenting observed climate change impacts and future risks from global to regional scales. Available as Open Access on Cambridge Core. *A History of Folding in Mathematics* Michael Friedman, 2018-05-25. While it is well known that the Delian problems are impossible to solve with a straightedge and compass, for example, it is impossible to construct a segment whose length is the cube root of 2 with these instruments, the discovery of the Italian mathematician Margherita Beloch Piazzolla in 1934 that one can in fact construct a segment of length the cube root of 2 with a single paper fold was completely ignored till the end of the 1980s. This comes as no surprise since, with few exceptions, paper folding was seldom considered as a mathematical practice, let alone as a mathematical procedure of inference or proof that could prompt novel mathematical discoveries. A few questions immediately arise: Why did paper folding become a non-instrument? What caused the marginalisation of this technique? And how was the mathematical knowledge which was nevertheless transmitted and prompted by paper folding later treated and conceptualised? Aiming to answer these questions, this volume provides for the first time an extensive historical study on the history of folding in mathematics, spanning from the 16th century to the 20th century, and offers a general study on the ways mathematical knowledge is marginalised, disappears, is ignored or becomes

obsolete In doing so it makes a valuable contribution to the field of history and philosophy of science particularly the history and philosophy of mathematics and is highly recommended for anyone interested in these topics

Technologies in Biomedical and Life Sciences Education Harry J. Witchel, Michael W. Lee, 2022-06-24 This contributed volume focuses on understanding the educational strengths and weaknesses of mediated content including media as a learning supplement in comparison to traditional face to face learning Each chapter includes research on and a broad brush summary of approaches to combining life sciences education with educational technologies The chapters are organized into four main sections each of which focuses on a key question regarding the consequences of incorporating media into education In this regard the authors highlight how educational technology is both a bridge and barrier to student access and inclusivity Further they address the ongoing discussion as to whether students need to be present for lectures and on how having agency in their own learning can improve both retention and conceptual understanding To link the content to current events the authors also shed light on the impact that the COVID 19 pandemic is having on the continuity of educational programs and on the growing importance of educational technologies Consequently the book offers life science educators valuable guidance on the technologies already available and an outlook on what is yet to come
