Physical Science Paper 2 September 2013

Siddappa N.Byrareddy

Physical Science Paper 2 September 2013:

Can Science Fix Climate Change? Mike Hulme, 2014-06-04 Climate change seems to be an insurmountable problem. Political solutions have so far had little impact. Some scientists are now advocating the so called Plan B a more direct way of reducing the rate of future warming by reflecting more sunlight back to space creating a thermostat in the sky. In this book Mike Hulme argues against this kind of hubristic techno fix. Drawing upon a distinguished career studying the science politics and ethics of climate change he shows why using science to fix the global climate is undesirable, ungovernable and unattainable. Science and technology should instead serve the more pragmatic goals of increasing societal resilience to weather risks, improving regional air quality and driving forward an energy technology transition. Seeking to reset the planet's thermostat is not the answer.

The Secure and the Dispossessed Nick Buxton, Ben Hayes, 2015-11-20 While the world's scientists and many of its inhabitants despair at the impact of climate change, corporate and military leaders see nothing but opportunities. For them, melting ice caps mean newly accessible fossil fuels, borders to be secured from climate refugees, social conflicts to be managed and more failed states in which to intervene. They are securing their assets at the expense of the planet and its inhabitants. *The Secure and the Dispossessed* looks at these deadly approaches with a critical eye. It also considers the flip side that the legitimacy of the elite is under unprecedented pressure from resistance by communities to resource grabs by those creating new ecological and socially just models for managing our energy, food and water. Topics covered include geoengineering, militarism, refugee protection, greenwashing and the agricultural crisis among others. Adaptation and resilience to a climate changed world is desperately needed but the form it will take will affect all of our futures.

Smart Grid Applications and Developments Daphne Mah, Peter Hills, Victor O.K. Li, Richard Balme, 2014-07-25 Meeting today's energy and climate challenges require not only technological advancement but also a good understanding of stakeholders' perceptions, political sensitivity, well informed policy analyses and innovative interdisciplinary solutions.
