

1. A nurse is caring for a client with hyperparathyroidism and notes that the client's serum calcium level is 13 mg/dL. Which medication should the nurse prepare to administer as prescribed to the client?

1. Calcium chloride
2. Calcium gluconate
3. Calcitonin (Miacalcin)
4. Large doses of vitamin D

3. Calcitonin (Miacalcin)

Rationale:

The normal serum calcium level is 8.6 to 10.0 mg/dL. This client is experiencing hypercalcemia. Calcium gluconate and calcium chloride are medications used for the treatment of tetany, which occurs as a result of acute hypocalcemia. In hypercalcemia, large doses of vitamin D need to be avoided. Calcitonin, a thyroid hormone, decreases the plasma calcium level by inhibiting bone resorption and lowering the serum calcium concentration.

2. Oral iron supplements are prescribed for a 6-year-old child with iron deficiency anemia. The nurse instructs the mother to administer the iron with which best food item?

1. Milk
2. Water
3. Apple juice
4. Orange juice

4. Orange juice

Rationale:

Vitamin C increases the absorption of iron by the body. The mother should be instructed to administer the medication with a citrus fruit or a juice that is high in vitamin C. Milk may affect absorption of the iron. Water will not assist in absorption. Orange juice contains a greater amount of vitamin C than apple juice.

3. Salicylic acid is prescribed for a client with a diagnosis of psoriasis. The nurse monitors the client, knowing that which of the following would indicate the presence of systemic toxicity from this medication?

1. Tinnitus
2. Diarrhea
3. Constipation
4. Decreased respirations

1. Tinnitus

Rationale:

Salicylic acid is absorbed readily through the skin, and systemic toxicity (salicylism) can result. Symptoms include tinnitus, dizziness, hyperpnea, and psychological disturbances. Constipation and diarrhea are not associated with salicylism.

4. A client with severe acne is seen in the clinic and the health

1. Vitamin A

Rationale:

# Pharmacology Nclex Questions And Rationales

**Maria Youtman**

## **Pharmacology Nclex Questions And Rationales:**

**Nclex Pharmacology** Chris Mulder,2017-07-26 Pharmacology is an important nursing skill set that we all must learn how to master The problem is that most books drown you in information that makes it nearly impossible to remember This book is organized in a concise way that keeps out all the fluff So if you re looking for a detailed in depth description of every possible medication then this probably isn t for you This is a review of some of the most common medications with the most relevant information written in a way you can understand Also included are 100 NCLEX style practice questions with rationales all related to nursing pharmacology Go over the medication review first and then check your knowledge on the test Come check us out at [www.kickassnursing.com](http://www.kickassnursing.com) for the blog and other Kick Ass Books such as NCLEX Lab Values You can also print out our free STAT Guides One page printable nursing cheat sheets Good luck in nursing school and beyond

**The Complete Question and Answer Book for the NCLEX-RN** Patricia A. Hoeffler,1995 NCLEX: Pharmacology for Nurses Nursing Aids,2016-06-20 Pharmacology is one of the most challenging subjects in nursing not only because there is over a thousand drugs out there in the market to be familiar with but also because pharmacology is a part of

every aspect of patient care In fact it is a hefty part of medical surgical nursing pediatrics maternal and child geriatrics hospice psychiatric nursing and even community nursing When flipping through the pages of a 3 inch thick drug handbook would be nurses feel a great sense of frustration They ask themselves How do I study this Which information should I focus on A proven strategy in becoming successful in Pharmacology is familiarizing oneself with the drugs One way of doing this is to answer as many NCLEX style questions on Pharmacology as you can and then study their rationales This narrows down concepts to the most significant ones Another strategy is to look at concepts that deal with safety issues Many questions revolve around safety It is the primary concern in Pharmacology Have there been new drugs introduced in the last 3 5 years Zero in on that too Do research on certain issues that actually happened in real life that greatly affected patient outcomes These strategies are going to work wonders in achieving your goals in becoming a registered nurse but to dig into books just to look for concepts that deal with safety and doing research on true to life accounts are too time consuming This is the main reason why you need this 100 question book The reliability of this book is ensured because nursing instructors who are experts in the field of Pharmacology developed the questions themselves Its purpose is to serve as a very useful tool in familiarizing aspiring nurses with the concepts More importantly it gives a fair head start in the NCLEX review because the instructors have done the digging and the research part for you Here in this book you will have a compilation of questions that revolve around safety and positive patient outcomes It will also feature new approved drugs and the concerns in their use It will also include current topics on Pharmacology with up to date information that will most likely come out in the NCLEX examination It will give you the right concepts and it will save you time especially during the hectic days of NCLEX preparation So get your head start now **Pharmacology Success** Kathryn Cadenhead Colgrove, 2018-09-18 Pharmacology made manageable Assure your mastery of pharmacology nursing knowledge while improving your critical thinking and test taking skills Over 1 200 NCLEX style questions on medication administration provide the practice you need to build your confidence Rationales for both correct and incorrect answers as well as Medication Memory Joggers for select questions
