Tales of Shit Petra Bongartz,2010

Urban Waste and Sanitation Services for Sustainable Development Bas van Vliet,Joost van Buuren,Shaaban Mgana,2013-11-12 Urban sanitation and solid waste sectors are under significant pressure in East Africa due to the lack of competent institutional capacity and the growth of the region s urban population This book presents and applies an original analytical approach to assess the existing socio technical mixtures of waste and sanitation systems and to ensure wider access increase flexibility and ecological sustainability It shows how the problem is not the current diversity in waste and sanitation infrastructures and services and variety of types and scales of technology of formal and informal sector involvement and of management and ownership modes The book focuses instead on the lack of an integrative approach to managing and upgrading of the various waste and sanitation configurations and services so as to ensure wider access flexibility and sustainability for the low income populations who happen to be the main stakeholders This approach coined Modernized Mixtures serves as a nexus throughout the book The empirical core addresses the waste and sanitation

challenges and debates at each scale from the micro level households to the macro level international support and is based on the results of a five year long interdisciplinary empirical research program It assesses the socio technical diversity in waste and sanitation and provides viable solutions to sanitation and waste management in East Africa This book provides students researchers and professional in environmental technology sociology management and urban planning with an integrated analytical perspective on centralized and decentralized waste and sanitation configurations and tools for improvement in the technology policy and management of sanitation and solid waste sectors

Regenerative Sanitation

Thammarat Koottatep, Peter Emmanuel Cookey, Chongrak Polprasert, 2019-02-15 This book proposes Regenerative Sanitation as the next era of sanitation management and attempts to provide a foundation for the study of sanitation on the premise that sanitation is a complex and dynamic system that comprises of social ecological technological and resource systems The preconception is that sanitation will deliver maximal benefits to society only when there exists a cyclical integration of the three subsystems to enable appropriate linkages between technological design and the delivery platform so as to achieve optimal and sustained sanitation solutions It also calls for the rethinking of sanitation to change the narrative towards more progressive trajectories such as resource recovery and reuse rather than just amelioration It explores the contributions to food security livelihood support urban regeneration rural development and even local economies A new paradigm theory and ten principles for ensuring practical and effective sanitation solutions and management is presented In addition is a unique conceptual framework applicable to both developed and developing countries and to all stages processes and cycles of delivering sanitation solutions that could critically evaluate analyse and provide credible adequate and appropriate sanitation solutions All of which culminates in a strategic and practical application platform called Sanitation 4.0 that advocates for total rejuvenation and comprehensive overhaul with eight key strategic considerations for the implementation Regenerative Sanitation A New Paradigm For Sanitation 4.0 is inter and trans disciplinary and encourages collaboration between engineers scientists technologists social scientists and others to provide effective and practical user centred solutions It includes relevant case studies examples exercise and future research recommendations It is written as both a textbook for researchers and students as well as a practitioners guide for policymakers and professionals
