## Phet Simulations For Physics:

**Using PhET Simulations in the Physics First Classroom** Josh Fencil, 2013 At the heart of every high school science course are laboratory activities Through these activities students interact with the course content in a way that provides meaningful actions to add to their overall learning experience However at times the content in physics courses becomes difficult to replicate in a typical high school laboratory By using PhET Interactive Simulations teachers around the world are able to add hundreds of new learning opportunities to their classrooms in just a few clicks of a mouse The simulations can be an effective way to provide high level physics instruction to a diverse population of students Using two particular PhET simulations The Collision Lab and Masses and Springs it was shown how simulations can not only take the place of some laboratory activities but enhance the ability for students to achieve learning outcomes
