Space Studies Board Annual Report 2017 National Academies of Sciences, Engineering, and Medicine, Division on Engineering and Physical Sciences, Space Studies Board, 2018-12-19 The original charter of the Space Science Board was established in June 1958 three months before the National Aeronautics and Space Administration NASA opened its doors The Space Science Board and its successor the Space Studies Board SSB have provided expert external and independent scientific and

programmatic advice to NASA on a continuous basis from NASA's inception until the present. The SSB has also provided such advice to other executive branch agencies including the National Oceanic and Atmospheric Administration (NOAA), the National Science Foundation (NSF), the U.S. Geological Survey (USGS), the Department of Defense, as well as to Congress. Space Studies Board Annual Report 2017 covers a message from the chair of the SSB, David N. Spergel. This report also explains the origins of the Space Science Board, how the Space Studies Board functions today, the SSB's collaboration with other National Academies of Sciences, Engineering, and Medicine units, assures the quality of the SSB reports, acknowledges the audience and sponsors, and expresses the necessity to enhance the outreach and improve dissemination of SSB reports. This report will be relevant to a full range of government audiences in civilian space research, including NASA, NSF, NOAA, USGS, and the Department of Energy, as well as members of the SSB policy makers and researchers.

Ryan Quinn and the Lion's Claw

Ron McGee, 2017-10-24. A suspenseful just won't quit adventure thriller. Ridley Pearson, author of the Kingdom Keepers series. Ryan Quinn and the Lion's Claw is the much-awaited sequel in the thrilling series about Ryan Quinn, a New York City teenager who would give James Bond and Jason Bourne a run for their money. Ryan Quinn has never been a normal kid, and after everything that happened in Andakar, he's about as far away from normal as could be. His parents want him to forget all about his death-defying escape, his role in the Emergency Rescue Committee, and the fact that they've been keeping secrets from him his whole life. But forgetting just isn't an option for Ryan, not when there's a traitor in the ERC who's looking to ruin Ryan's parents and expose the whole organization. Unsure where to turn or who to trust, Ryan and his friends Danny and Kasey soon find themselves on another adventure across the world to help a musician whose words have started a revolution. It's a globe-trotting mission more treacherous than Ryan could have ever imagined. And just when he feels like he's cracked the final clue, Ryan stumbles across the biggest secret of all, and it's about him. Fans of Alex Rider and Spy School will be completely enthralled by the second book in Ron McGee's high-stakes Ryan Quinn series.

National Academies of Sciences, Engineering, and Medicine, Division on Engineering and Physical Sciences, Space Studies Board, Committee on Large Strategic NASA Science Missions: Science Value and Role in a Balanced Portfolio, 2018-01-29. NASA's Science Mission Directorate (SMD) currently operates over five dozen missions with approximately two dozen additional missions in development. These missions span the scientific fields associated with SMD's four divisions: Astrophysics, Earth Science, Heliophysics, and Planetary Sciences. Because a single mission can consist of multiple spacecraft, NASA SMD is responsible for nearly 100 operational spacecraft. The most high-profile of these are the large strategic missions, often referred to as flagships. Large strategic missions are essential to maintaining the global leadership of the United States in space exploration and in science because only the United States has the budget, technology, and trained personnel in multiple scientific fields to conduct missions that attract a range of international partners. This report examines the role of large strategic missions within a balanced program across NASA SMD space and Earth sciences programs. It

considers the role and scientific productivity of such missions in advancing science technology and the long term health of the field and provides guidance that NASA can use to help set the priority of larger missions within a properly balanced program containing a range of mission classes

The Space Science Decadal Surveys National Academies of Sciences, Engineering, and Medicine, Division on Engineering and Physical Sciences, Space Studies Board, Committee on Survey of Surveys: Lessons Learned from the Decadal Survey Process, 2015-10-28 The National Research Council has conducted 11 decadal surveys in the Earth and space sciences since 1964 and released the latest four surveys in the past 8 years The decadal surveys are notable in their ability to sample thoroughly the research interest aspirations and needs of a scientific community Through a rigorous process a primary survey committee and thematic panels of community members construct a prioritized program of science goals and objectives and define an executable strategy for achieving them These reports play a critical role in defining the nation's agenda in that science area for the following 10 years and often beyond The Space Science Decadal Surveys considers the lessons learned from previous surveys and presents options for possible changes and improvements to the process including the statement of task advanced preparation organization and execution This report discusses valuable aspects of decadal surveys that could be taken further as well as some challenges future surveys are likely to face in searching for the richest areas of scientific endeavor seeking community consensus of where to go next and planning how to get there The Space Science Decadal Surveys describes aspects in the decadal survey prioritization process including balance in the science program and across the discipline balance between the needs of current researchers and the development of the future workforce and balance in mission scale smaller competed programs versus large strategic missions

Space,2010-08-23 In response to requests from Congress NASA asked the National Research Council to undertake a decadal survey of life and physical sciences in microgravity Developed in consultation with members of the life and physical sciences communities the guiding principle for the study is to set an agenda for research for the next decade that will allow the use of the space environment to solve complex problems in life and physical sciences so as to deliver both new knowledge and practical benefits for humankind as we become a spacefaring people The project s statement of task calls for delivery of two books an interim report and a final survey report Although the development of specific recommendations is deferred until the final book this interim report does attempt to identify programmatic needs and issues to guide near term decisions that are critical to strengthening the organization and management of life and physical sciences research at NASA **Science and Engineering Indicators (2 Vol.)** John R. Sciences, Space Studies Board, Committee on Heliophysics Performance Assessment, 2009-04-24 Since the 1990s the pace of discovery in the field of solar and space physics has accelerated largely owing to NASA investments in its Heliophysics Great Observatory fleet of spacecraft These enable researchers to investigate connections between events on the Sun and in the space environment by combining multiple points of view Recognizing the importance of observations of the Sun to Earth system the National Research Council produced a solar and space physics decadal survey in 2003 laying out the Integrated Research Strategy This strategy provided a prioritized list of flight missions plus theory and modeling programs that would advance the relevant physical theories incorporate those theories in models that describe a system of interactions between the Sun and the space environment obtain data on the system and analyze and test the adequacy of the theories and models Five years later this book measures NASA's progress toward the goals and priorities laid out in the 2003 study Unfortunately very little of the recommended priorities will be realized before 2013 Mission cost growth reordering of survey mission priorities and unrealized budget assumptions have delayed nearly all of the recommended NASA spacecraft missions The resulting loss of synergistic capabilities in space will constitute a serious impediment to future progress
