Leave no child behind UNESCO,2022-06-20 To leave no child behind UNESCO developed the first global report of this scope onboys disengagement from education bringing together qualitative and quantitativevidence from over 140 countries This report provides an

overview on the global situation on boys disengagement from and disadvantage in education. It identifies factors influencing boys' participation, progression and learning outcomes in education. It also analyses responses by governments and partners and examines promising policies and programmes. Finally, it includes recommendations on how to engage boys with education and address disadvantage. While girls continue to face severe disadvantages and inequalities in education, the report shows that boys in many countries are at greater risk than girls of repeating grades, failing to complete different education levels and having poorer learning outcomes in school. No less than 132 million boys of primary and secondary school age are out of school. They urgently require support. As this report shows, supporting boys does not mean that girls lose out and vice versa. Addressing boys' disengagement not only benefits boys' learning, employment opportunities, income and well-being; it is also highly beneficial for achieving gender equality and desirable economic, social and health outcomes.
