This book is about how the dreams of exploring other worlds became a reality with the Mercury Gemini and Apollo programs
The problems encountered in the development of the spacecraft including the disastrous fire aboard Apollo 1 which resulted
in the deaths of the three American astronauts Gus Grissom Ed White and Roger Chafee are covered When Neil Armstrong
stepped out onto the surface of the Moon on 20 July 1969 many people thought that this was the first time man had visited its
nearest neighbor Although this was the first manned landing there had been forty one missions prior to this by both the
Americans and the Russians This book is about all those missions and the sixty five missions that followed Also included
although in much lesser detail is the part the Russians played in the formative years of the space race and the problems they
encountered culminating in the successful Apollo Soyuz program which proved that the two super powers could work
together The laboratory in the sky Skylab the forerunner of the ISS station is also covered The book contains over 200
photographs all of which are either credited to NASA or from the author s own collection The sources include
correspondence and the author s personal conversations with some of the astronauts involved in the early part of the space

story of manned spaceflight from its inception to the era of the Space Shuttle It begins with a short history of the evolution of
the rocket before describing the first manned rocket flights by both the Americans and the Russians There is also the little
known story of what is thought to be the earliest manned rocket flight said to have taken place in 1933 on the island of R gen
in the Baltic under the control of the German War Ministry The story continues through Yuri Gagarin becoming the first
person in space and Neil Armstrong s giant leap for mankind to the first space stations Skylab Salyut and Mir With the
development of the Shuttle the USA moved ahead in the space race but the Americans and Russians soon realised that it was
easier to co operate than compete and the two nations began to work together for the first time Terry C Treadwell s book is a
