

The separate front seats are individually adjustable through a 12° range. To adjust the seat, pull up on the seat adjustment handle, located under the front center console of the seat, and move the seat to the desired position. In fixing the seat in any given position, be sure that the locking pin is securely engaged.

To remove either of the front seats (the back seat's cylinder is under the left and the battery is under the right), slide the seat all the way forward until it is against the stop, reach under and to the rear of the forward seat track and locate the stop pin which protrudes through the bottom of the seat tube, depress this pin and slide the seat on forward until it is free of the track.

The rear seat area is readily converted to a cargo compartment by removing or folding the rear seat. To remove the seat, detach the cushions from the lower support tube, remove the support tube from the seat, slide the front cushions, and remove the back cushions and canvas from the upper support tube. If desired, the back cushions and canvas can be folded rearward into the baggage compartment instead of being removed completely.
