Fund. Research Dept.,2024-04-16 The latest World Economic Outlook reports economic activity was surprisingly resilient through the global disinflation of 2022-23 despite significant central bank interest rate hikes to restore price stability. Risks to the global outlook are now broadly balanced compared with last year. Monetary policy should ensure that inflation touches down smoothly while a renewed focus on fiscal consolidation is needed to rebuild room for budgetary maneuver and to ensure debt sustainability. Structural reforms are crucial to revive medium-term growth prospects amid constrained policy space.

Reality and Morality Billy Dunaway,2020-07-03 Reality and Morality develops and defends a framework for moral realism. It defends the idea that moral properties are metaphysically elite or privileged parts of reality and argues that realists can hold that this makes them highly eligible as the referents for our moral terms. An application of a thesis sometimes called reference magnetism. Billy Dunaway elaborates on these theses by introducing some natural claims about how we can know about morality by having beliefs that are free from a kind of risk of error. This package of theses in metaphysics, meta-semantics, and epistemology is motivated with a view to explaining possible moral disagreements. Many writers have emphasized the scope of moral disagreement and have given compelling examples of possible users of moral language who appear to be genuinely disagreeing rather than talking past one another with their use of moral language. What has gone unnoticed is that there are limits to these possible disagreements and not all possible users of moral language are naturally interpreted as capable of genuine disagreement. The realist view developed in Reality and Morality can explain both the extent of and the limits to moral disagreement and thereby has explanatory power that counts significantly in its favour.
