- If you have the food in a bowl or on a plate, start by placing the empty bowl or plate on the platform and press **ON/ZERO** to subtract the weight of that bowl or plate.
- THEN**, place food in the bowl or plate to get the weight of the food.

Next, use the **UP/DOWN** keys to scroll through the food list until you find your food. When you get to the food name you want, press the **SmartPoints** button to see its SmartPoints value.

TIP: Press **CE** if you want to start again and weigh another food.

Calculating the SmartPoints values of packaged foods

FIRST, press **INPUT**. Then use the number keys followed by **ENTER** to provide each of the following per serving information (in grams): Calories, Saturated Fat, Sugars, and Protein.

THEN, type in the serving size shown on the packaging in grams and press **ENTER**. Place the food on the scale and the SmartPoints value will be displayed. (The SmartPoints value will display a zero until you place the food on the scale.)

Saving your favorite packaged foods to your scale

You can also save up to 10 of your favorite foods in your scale's memory. To save a food, complete steps above. When the SmartPoints value of that food is shown, press **INPUT**. Use the keypad to type in the food name and press **ENTER** to save. It's now saved to your scale's memory!

You might notice SmartPoints differ from the SmartPoints values of foods you calculate using the nutrition label and the database versus the SmartPoints values listed for food products in the Food or plan guides. That's because the SmartPoints values of foods in our database are based on SmartPoints ingredients from our algorithm to reflect those ingredients. If this happens, use the SmartPoints value listed in the 1 column on our website, or in our app. WW Logo and SmartPoints are the trademarks of WW International, Inc.
