RENNER variable speed control

Wide fluctuations in compressed air demand cannot be avoided in many plants. RENNER screw compressors with variable speed control ensure that compressed air is generated economically. The compressor output is automatically adjusted to the actual compressed air demand via an infinitely adjustable speed control. This ensures that your compressor runs cost-efficiently. Frequency converter and control unit are built in the compressor system.

RENNERtronic Touch controls

Smartphone-like operation: Intuitively operable touchscreen on state-of-the-art technology.

Timer with six channels: This can be used to switch the four pressure bands, four potential-free relay contacts or the compressor.

USB port: Updates can be easily uploaded using a USB stick.

Service indication: Maintenance message will be shown when the set operating hour interval is reached or at the latest after one year.

Display of compressor utilization: Recording of operating and load hours as well as the percentage load for compressors with variable speed control.

Control of frequency converters: direct connection via RS-485 bus interface, exchange of information in **plain text**.

The Software of RENNERtronic Plus Touch is equipped with an extensive **Base Load Change Order**, control up to eight additional compressors
