*The Metainterface* Christian Ulrik Andersen, Soren Bro Pold, 2023-10-31 How the interface has moved from the PC into cultural platforms as seen in a series of works of net art software art and electronic literature The computer interface is both omnipresent and invisible at once embedded in everyday objects and characterized by hidden exchanges of information between objects The interface has moved from office into culture with devices apps the cloud and data streams as new cultural platforms In *The Metainterface* Christian Ulrik Andersen and Soren Bro Pold examine the relationships between art and interfaces tracing the interface's disruption of everyday cultural practices They present a new interface paradigm of cloud services smartphones and data capture and examine how particular art forms including net art software art and electronic literature seek to reflect and explore this paradigm Andersen and Pold argue that despite attempts to make the interface disappear into smooth access and smart interaction it gradually resurfaces there is a metainterface to the displaced interface Art can help us see this the interface can be an important outlet for aesthetic critique Andersen and Pold describe the semantic capitalism of a metainterface industry that captures user behavior the metainterface industry's disruption of everyday urban life changing how the city is read inhabited and organized the ways that the material displacement of the cloud affects the experience of the interface and the potential of designing with an awareness of the language and grammar of interfaces

**Sideways** Josh O'Kane, 2022-09-13 NATIONAL BESTSELLER FINALIST FOR THE WRITERS TRUST SHAUGHNESSY COHEN PRIZE FOR POLITICAL WRITING From the Globe and Mail tech reporter who revealed countless controversies while following the Sidewalk Labs fiasco in Toronto an uncompromising investigation into the bigger story and what the Google sister company's failure there reveals about Big Tech data privacy and the monetization of everything When former New York deputy mayor Dan Doctoroff landed in Toronto promising a revolution in better living through technology the locals were starstruck In 2017 a small parcel of land on the city's woefully underdeveloped lakeshore was available for development and with Google co-founder Larry Page and his trusted chairman Eric Schmidt leaning into Sidewalk Labs pitch for the long forsaken property with Doctoroff as the urban planning company's CEO Sidewalk's bid crushed the competition But as soon as the bid was won cracks appeared in the partnership between Doctoroff's team and Waterfront Toronto the government sponsored organization behind the contest There were hundreds more acres of undeveloped former port lands nearby that kept creeping into conversation with Sidewalk and more questions were emerging than answers about how much the public would actually benefit from the Alphabet owned company's vision for the high tech neighbourhood and the data it could harvest from the people living there Alarm bells began ringing in the city's corridors of power and activism To Torontonians accustomed to big promises with little follow through the fiasco that unfolded seemed at first like just another city building sideshow But the pained battle to reel in the power of Sidewalk Labs became a crucible moment in the worldwide battle for privacy rights and against the extension of Big Tech's digital might into the physical world around us

With extensive contacts on all sides of the debacle O Kane tells a story of global consequence fought over a small forgotten parcel of mud and pavement taking readers from California to New York to Toronto to Berlin and back again In the tradition of extraordinary boardroom dramas like *Bad Blood* and *Super Pumped Sideways* vividly recreates the corporate drama and epic personalities in this David and Goliath battle that signalled to the world that all may not be lost in the effort to contain the rapidly growing power of Big Tech

Reading Writing Interfaces Lori Emerson,2014-06-01 Lori Emerson examines how interfaces from today s multitouch devices to yesterday s desktops from typewriters to Emily Dickinson s self bound fascicle volumes mediate between writer and text as well as between writer and reader Following the threads of experimental writing from the present into the past she shows how writers have long tested and transgressed technological boundaries Reading the means of production as well as the creative works they produce Emerson demonstrates that technologies are more than mere tools and that the interface is not a neutral border between writer and machine but is in fact a collaborative creative space Reading Writing Interfaces begins with digital literature s defiance of the alleged invisibility of ubiquitous computing
