|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------|

| <b>Minor chords (m)</b><br>To play a minor chord, keep the major chord key depressed and press any other accompaniment keyboard key located to the right of the major chord key.                                                            | <b>C minor (Cm)</b><br>          |
| <b>Seventh chords (7)</b><br>To play a seventh chord, keep the major chord key depressed and press any other two accompaniment keyboard keys located to the right of the major chord key.                                                   | <b>C seventh (C7)</b><br>        |
| <b>Minor seventh chords (m7)</b><br>To play a minor seventh chord, keep the major chord key depressed and press any other three accompaniment keyboard keys located to the right of the major chord key.                                    | <b>C minor seventh (Cm7)</b><br> |

#### NOTE

It makes no difference whether you press black or white keys to the right of a major chord key when playing minor and seventh chords.

## FINGERED

FINGERED provides you with a total of 15 different chord types. The following describes the FINGERED "Accompaniment keyboard" and "Melody keyboard", and tells you how to play a C-root chord using FINGERED.

### FINGERED Accompaniment Keyboard and Melody Keyboard

#### NOTE

The accompaniment keyboard can be used for playing chords only. No sound will be produced if you try playing single melody notes on the accompaniment keyboard.

\*1: Inverted fingerings cannot be used. The lowest note is the root.

\*2: The same chord can be played without pressing the 5th G.

#### NOTES

- Except for the chords specified in note\*1 above, inverted fingerings (i.e. playing E-G-C or G-C-E instead of C-E-G) will produce the same chords as the standard fingering.
- Except for the exception specified in note\*2 above, all of the keys that make up a chord must be pressed. Failure to press even a single key will not play the desired FINGERED chord.
