Application and Evaluation of Acupuncture in the Treatment of Neurological Diseases Liming Lu, Nenggui Xu, Myeong Soo Lee, Chunzhi Tang, Yong Tang, Bing

Zhu, 2023-06-21 Neurological disorders such as Alzheimer s disease and Parkinson s disease are an important cause of disability and death worldwide and pose a serious burden on the global health system over the past 30 years Acupuncture as the most widely used traditional Chinese medicine therapy in the world has been widely used in 183 countries and regions Acupuncture can treat more than 300 kinds of diseases especially for neurological diseases Due to the unique advantages of acupuncture such as good therapeutic effect and low side effects many researchers have conducted extensive clinical studies on the effectiveness and safety of acupuncture in the treatment of neurological diseases laying a foundation for the practicability and scientific vigor of this complementary and alternative therapeutic approach There are still many problems unanswered in the current clinical research on acupuncture for the treatment of neurological diseases First of all clinical research is lagging behind due to the lack of emphasis on modern advanced methods and analytical techniques e g artificial intelligence omics analysis bioinformatics analysis data mining and multidisciplinary integration process Secondly the quality

of reports on most clinical studies of acupuncture treatment for neurological diseases is extremely low. Most clinical studies have not adopted standardized methodological evaluations, authoritative disease diagnosis standards, and efficacy evaluation standards. The lack of compliance regulations and strict study design reduces the accuracy and authenticity of the research. Thirdly, there is a lack of integrated assessment of the distribution of evidence for acupuncture treatment of neurological diseases. Therefore, strictly designed clinical research and in-depth and systematic analysis methods are currently needed to provide high quality evidence for acupuncture treatment of neurological diseases. In this Research Topic, we hope to further understand the role of acupuncture in the treatment of neurological diseases through clinical research and secondary research. The range of acupuncture includes manual acupuncture, electro acupuncture, body needling, auricular acupuncture, scalp acupuncture, laser acupuncture, and acupressure, etc. Neurological diseases include stroke, meningitis, encephalitis, tetanus, Alzheimer's disease, and other dementias, Parkinson's disease, epilepsy, multiple sclerosis, motor neurone disease, migraine, tense type headaches, headaches from drug overuse, and others.

Guía Clínica SoHAH | manual multidisciplinar para el manejo del dolor inguinal crónico Alfredo Moreno Egea, 2019-08-26. El término que engloba esta Guía de dolor inguinal crónico es el más descriptivo, el más acertado, el que recoge todas las patologías a nivel de esta región anatómica con síntomas dolorosos desde la pubalgia, la hernia del deportista, la hernia atlética, el choque acetabular, la osteomiopatia de pubis, etc. a la inguinodinia posoperatoria en los pacientes intervenidos de una hernia inguinal. Cada cuadro clínico con un diagnóstico complejo como consecuencia de factores etiopatológicos diferentes y también con tratamientos distintos. Por eso entra aquí el concepto multidisciplinar que completa el título de este compendio. Son varios los especialistas que deben intervenir en su manejo y solución. Siguiendo aquí las palabras del Dr. Dvila de su último artículo en nuestra Revista Hispanoamericana de Hernia: El dolor inguinal posoperatorio crónico DIPC se ha convertido en las últimas décadas de forma progresiva y contumaz en la secuela, quizás más preocupante, de la cirugía herniaria. El dolor inguinal crónico es muy invalidante; su diagnóstico y tratamiento dependen de los conocimientos y experiencia del cirujano, como expresa con claridad el Dr. Moreno Egea en su genial frase: Cuando un cirujano trata a una persona con dolor inguinal, debe primero volver a ser médico. Y no uno cualquiera, el mejor. Médico para su paciente. Y al final, solo al final, debe volver a ser cirujano. Y no uno cualquiera, el mejor Cirujano Especialista. Esta es la buena receta que puede asegurar un buen resultado. Esta Guía de Manejo Multidisciplinar del dolor inguinal crónico no solo refleja la actualidad y preocupación de los cirujanos, que con frecuencia vemos personas-pacientes con este invalidante cuadro, sino que clarifica, da luz y esperanza en su solución, recogiendo toda la evidencia y conocimientos actuales.

Laparoscopic and Robotic Incisional Hernia Repair Karl A. LeBlanc, 2018-10-19. The field of hernia repair in general has evolved over the last 25 years. The changes that have followed the introduction of this technique have continued and have even increased in the last few years. There is a need to inform the practicing general surgeon about these advances. This text will seek to present the most up to date and important considerations to date. The

book will open with a brief history and evolution of the technology surrounding the repair of incisional and ventral hernias laparoscopically and include the introduction of the robotic technology Prosthetic biomaterials are an integral part of the successful repair of hernias and a comprehensive presentation of these products will be presented Preoperative preparation of the patient has now been recognized as a method to improve outcomes in these patients and will be addressed Technical aspects of the repair of these hernias will then follow in an orderly fashion to include the general considerations of the methodology The best practices of these methods will be presented with appropriate figures and illustrations The management of difficult situations as well as expected outcomes will be discussed It is the intent of this text that any surgeon interested in the use of the minimally invasive techniques to repair the incisional and ventral hernias of the abdominal wall will have this resource presenting current opinions and methods The thought leaders in these methods will be the authors of these chapters This title differs from the Springer related title Novitsky Hernia Surgery The Novinsky is more comprehensive at 530 pages It contains many more illustrations and video The LeBlanc focuses on Laparoscopic and Robotic Hernia surgery with an estimated page count of 300 350 The LeBlanc presents current opinions of the thought leaders Therefore the subtitle Current Considerations *Toyota Prado Automotive Repair Manual* Jeff Killingsworth, John Harold Haynes, 2006-01-01

Restoring Functional Behaviors After Traumatic Peripheral Nerve Injuries George Davis Bittner, Jared Bushman, Jaimie Shores, Joseph Alderete, Dale Sengelaub, 2024-02-20 Peripheral nerve injuries PNIs by trauma are the most common neuronal injury in civilian and military populations and significantly burden health care systems Mammals including humans with PNIs experience 1 immediate loss of sensory and motor functions mediated by the denervated target tissues 2 rapid 3 7d Wallerian Degeneration WD of severed distal axonal segments and 3 slow 1mm day regeneration by naturally occurring axonal outgrowths from surviving severed proximal stumps that produce poor if any functional recovery because of slow axonal regeneration for long distances and lack of axonal guidance Denervated muscle fibers and sensory organs often atrophy before any re innervation can occur
